ixon Cites National Security Interests Admitting 'Cover-Up' by His Aides

Maintains Innocence; Will Stay on Job

WASHINGTON, May 22 (AP). —President Nixon declared today he will not resign because of the Watergate scandal. He acknowledged the existence of a wide-ranging cover-up by his subordinates, but warned that present investigations threaten to damage national security.

"I will not abandon my responsibilities," he declared. "I will continue to do the job I was elected to do."

In two statements issued at the White House—a 3,500-word declaration and a summary of that document—Mr. Nixon specifically denied that he knew of the Watergate wiretapping in advance, that he offered executive clemency to defendants in the case or that he knew until recently that his personal lawyer, Herbert W. Kalmbach, was providing the defendants with funds.

He also denied that he attempted to implicate the Central Intelligence Agency in the scandal, that he knew until recently of the break-in at the office of Daniel Ellsberg's psychiatrist or that he authorized or encouraged subordinates to engage in illegal or improper campaign tactics.

But he said that it now seems "there were apparently wide-ranging efforts to limit the investigation or to conceal the possible involvement of members of the administration and the [Nixon re-election] campaign committee."

Action White House legal counsel Leonard Garment told newsmen that one purpose of the President's statement was to induce court officials not to make public some classified documents removed from the White House and turned over to court officials by fired presidential legal counsel John W. Dean 3d.

Mr. Nixon said that the Dean documents contain a plan, never put into effect, to use breaking and entering to gain national security information.

The President said that these documents are "extremely sensitive. They include—and are based upon—assessments of certain foreign intelligence capabilities and procedures, which of course must remain secret."

This plan was drawn up in 1970, amid a wave of bomb threats, bombing and campus demonstrations, the President said. It was intended to replace "certain types of undercover FBI operations" that had been suspended in 1966 after many years.

Mr. Nixon said that these included surreptitious entry, breaking-and-entering operations "on specified categories of targets in specified situations related to national security."

Mr. Nixon said that the plan was formulated at his order by the heads of the FBI, the CIA, the Defense Intelligence Agency and the National Security Agency.

He said that the plan was approved tentatively July 23, 1970, but that approval was withdrawn five days later because FBI Director J. Edgar Hoover, since deceased, strongly objected to it.

Copies of the Dean documents have been made available to Senate investigators and the Watergate prosecutors.

Mr. Nixon noted that newspapers today headlined portions of the plan that were made public by Sen. Stuart Symington, D., Mo., acting chairman of the Senate Armed Services Committee. Sen. Symington has promised to make a censored version of the plan public sometime soon.

The President cited the scuttled intelligence-gathering plans as one example of how national security matters had become entangled in the Watergate case.

He said that some sensitive documents already had been made public, and others were threatened with disclosure.

Mr. Nixon said he wants to separate national security matters from the Watergate case.

In one section of his statement, Mr. Nixon sought directly to counter any suggestion that he had sought to hamper the FBI's Watergate inquiries by suggesting that they might compromise CIA operations.

Tells of Orders to Aides

The President acknowledged that he initially thought "there was a possibility of CIA involvement in some way," and ordered his since-resigned top aides, H.R. Haldeman and John D. Ehrlichman, "to insure that the investigation of the break-in not expose an unrelated covert operation of the CIA or the activities of the White House investigations unit" —the group that came to be known as the Plumbers, which had been set up to trace and plug government news leaks.

"It was certainly not my intent, nor my wish, that the investigation of the Watergate break-in or of related acts be impeded in any way," he said.

"It now seems that later, through whatever complex of individual motives and possible misunderstandings, there were apparently wide-ranging efforts to limit the investigation or to conceal the possible involvement of members of the administration and the campaign committee," the President conceded.

He said that L. Patrick Gray 3d, then acting director of the FBI, suggested to him in a telephone conversation last July 6 "that the matter of Watergate might lead higher."

Mr. Nixon said in his statement: "I told him to press ahead with his investigation."

In a major departure from past White House policy, Mr. Nixon announced that "executive privilege will not be invoked as to any testimony concerning

400-Pound Bomb in Car Rips Government Offices in Belfast

BELFAST, May 22 (Reuters). —A large car bomb ripped open the front of a block of government offices in the heart of Belfast today close to City Hall, itself widely believed to be one of the top targets on the bombing list of Irish Republican Army guerrillas.

The blast came a few minutes after police received an anonymous warning about the bomb, estimated to have contained some 400 pounds of explosives and believed to be one of the biggest set off in the city during the current troubles.

Hundreds of office workers and shoppers were cleared from the area on Adelaide Street and there were no casualties when the bomb went off with a blast that was heard all over the city.

It was the third car bomb in Belfast in the last five days and raised fears that Republican guerrillas might be switching back to this type of weapon in order to be able to stage larger explosions than have been common in recent months.

Another car bomb near the center of Londonderry today wrecked five shops.

A bomb left in a car was the favorite device of the militant Provisional Wing of the IRA in 1971 and 1972 but in recent months the guerrillas have been planting explosives by hand.

This method was used today in Belfast by a youth and a girl who walked into a shoe shop about a mile from Adelaide Street and left explosives in a bag on the counter. But the bomb was defused by British Army experts.

Before today's blast the city had been swept by a wave of bomb scares which halted traffic on its main streets.

Later, a 21-year-old Londonderry Roman Catholic injured in rioting last Thursday night died in a hospital, the 882nd fatality in the almost four years of Ulster violence.

council approved those countries te for the resolu- tion today will not consider themselves bound by them.

The vetoed resolution would have limited countries to the levels prevailing in 1965 for their purchases of chromium ores, asbestos, tobacco, pig iron, copper, sugar, corn and other products from South Africa, Mozambique and Angola.

These are all commodities produced by Rhodesia which South Africa and the Portuguese territories are suspected of having permitted to pass through their territory as third parties for later illegal importation.

The resolution would also have denied landing rights to the national carriers of countries that grant such rights to Rhodesian aircraft, and have extended the British naval blockade of the Portuguese port of Beira to Lourenço Marques.

It would have condemned "all those governments, in particular South Africa and Portugal, that encourage, assist or connive at the violations of sanctions against Rhodesia."

Seen as Warm-up for U.S. Trip

ev Leaves Bonn After 'Friendly' Talks

R. Whitney

(NYT).—Leonid most powerful Union, returned morning after what he called ive and truly with Chancellor is effusive hand- is to his hosts minutes late in

participants, not- y Mr. Brezhnev personal charm ere, believe the visit was a sort l for the one he to Washington

that he will be ven bigger scale about the same deals as he proposed here Saturday night to a group of German industrialists, whose heads are still spinning. Mr. Brezhnev proposed exchanges of Soviet raw materials in return for Western technology and industrial plant and long-term credits of "30 to 50 years."

These pledges, in vaguer terms, were also put down on paper in a joint declaration signed by the two men last night.

"This grand panorama of trade, better relations and cultural exchanges is, as far as we can determine, a reflection of a basic, even irrevocable decision that this man is willing to bet on cooperation for decades to come with the West," one German participant said today. "This means he has to have a security and military policy to match."

To the German people—who have been divided into two ideologically hostile states ever since the Soviet Army and the Western Allies crushed and partitioned Germany in 1945—this new policy has held out the hope of reduced tensions, not just with the Soviet Union but between East and West Germany.

The Brezhnev visit was a powerful though remote symbol of this process—one consequence of the fundamental treaty of August, 1970, in which Moscow and Bonn normalized their "cold war" relations and of the later similar treaties between Bonn and East Berlin and Bonn and Warsaw.

Now the Russians and the West Germans have signed a 10-year economic cooperation agreement and have put themselves on record as being in favor of other forms of cooperation.

Nominee Recalled by Committee

Challenges by Ellsberg Delay Senate Action on Richardson

WASHINGTON, May 22 (AP). —The Senate Judiciary Committee today postponed its vote on Elliot L. Richardson's nomination to be attorney general after two members said that Daniel Ellsberg had told them of apparent inconsistencies between Mr. Richardson's testimony to the committee and an affidavit in the Pentagon papers case.

The committee had been scheduled to vote on the nomination without hearing any witnesses today, but after Senators Edward M. Kennedy, D., Mass., and Robert C. Byrd, D., W.Va., told of the Ellsberg challenges, the committee reopened its questioning of Mr. Richardson.

The panel then spent more than two hours questioning him. He was scheduled to undergo additional interrogation and it was uncertain whether the committee would vote on the nomination today.

Yesterday, the committee had reached agreement that Mr. Richardson's choice of a special prosecutor in the Watergate affair and his delineation of the prosecutor's operations were appropriate.

The designated special prosecutor, Harvard law Prof. Archibald Cox, had appeared with Mr. Richardson yesterday to tell the committee of the guidelines for Mr. Cox's work.

Senators' Confidence

Mr. Cox, a former U.S. solicitor general, vowed to follow all leads on political espionage in last year's presidential election campaign, and several senators on the committee then voiced confidence in his independence. This independence, they said, could give the public confidence in any report that Mr. Cox might finally make on his investigations, expected to take more than a year.

The committee then considered its testimony on Mr. Richardson's nomination ended—a prerequisite was its questioning of his special Watergate prosecutor—and Chairman James O. Eastland, D., Miss., said he hoped for a full Senate vote confirming Mr. Richardson by Thursday's Memorial Day recess.

After this morning's surprise reopening of testimony in the hearing, Mr. Richardson was questioned at length about a meeting he had on May 1 with Egil Krogh, a former White House aide who has taken the

Gold Price Off As Dollar Gains

PARIS, May 22 (IHT).—The price of gold fell back from the record highs set yesterday while the dollar improved on foreign exchange markets today.

Dealers said trading remained nervous on rather small volume and warned that the markets would continue to be "extremely volatile" until basic suspicions about the dollar are overcome. Details Page 7.

U.S. Living Costs Rose .6% In April, Food Tops List

By Peter Milius

WASHINGTON, May 22 (AP). —The cost of living rose another .6 percent last month, with food again the big offender, the Labor Department said today.

The rise was not as big as in the two preceding months, and Herbert Stein, chairman of the Council of Economic Advisers, said it "suggests that the wave of inflation which swept over the country in the winter is receding."

But AFL-CIO president George Meany said "no housewife could possibly agree" that the new figures constitute good news.

"The latest report . . . adds up to more bad news," said Mr. Meany. "The figures show that in the past three months, the yearly rate of increase in the cost of living was 9.2 percent—far beyond the administration's prediction of a 3.5 percent rate of increase."

The White House has said that inflation will be down to a 2.5 percent rate on an annual basis by year's end.

The rise in the consumer price index will mean an automatic 6.1 percent increase in monthly pension checks for all retired federal employees, and any others who retire by June 30.

The April consumer price index for all items showed a climb of .9 index point from March, up from 129.8 to 130.7.

The index figure, based on 1967 prices, means it took $13.07 in April to pay for the same "market basket" of typical family goods and services that cost $10.00 six years ago.

In a separate report the Labor

'Never Spoke to President'

Caulfield Says Dean Told Him To Offer McCord Clemency

WASHINGTON, May 22 (AP). —A former White House law enforcement aide testified today that he offered executive clemency to Watergate burglar James W. McCord jr. on orders of presidential counsel John W. Dean 3d.

John J. Caulfield said he never spoke to any other White House officials about the matter, and denied that he had used President Nixon's name in connection with the offer. McCord swore Friday that Mr. Caulfield had told him that Mr. Nixon was aware of the offer.

Mr. Caulfield said, "I specifically never spoke to the President of the United States and have no knowledge of my own as to whether he personally had endorsed this offer, or indeed whether anyone had ever discussed it with him."

He said that he asked Mr. Dean: "Do you want me to tell him it comes from the President?

"He said words to the effect, 'No, don't do that. Say that it comes from way up at the top.'"

Mr. Caulfield had been an aide to Mr. Dean at the White House, and was employed at the Treasury Department at the time he offered clemency to McCord last January, during the trial of McCord and others on charges of burglary, conspiracy and wiretapping.

He said that Mr. Dean "impressed upon me that this was a very grave situation which might some day threaten the President, that it had the potential of becoming a national scandal, and that many people in the White House were quite concerned about it.

"Mr. Dean said that none of the other then defendants in the Watergate burglary 'were any problem,' and that Mr. McCord 'was not cooperating with his attorney.'"

McCord said his attorney, Gerald Alch, relayed to him pressure to blame the CIA for the Watergate break-in and wiretapping.

Mr. Caulfield said he believed

(Continued on Page 2, Col. 6)

Would Have Included Embassies

Nixon Aide Had Extensive Break-in Plan

By William L. Claiborne

WASHINGTON, May 22 (WP). —A White House aide drafted a broad plan of domestic espionage in the summer of 1970 that included break-ins at foreign embassies, burglaries and other illegal activities, Sen. Stuart Symington, D., Mo., disclosed yesterday.

He said the written proposal was marked so that copies would go to President Nixon and White House chief of staff H. R. Haldeman.

However, he said, the plans for the most part were not implemented when the late FBI director J. Edgar Hoover raised "strong objections."

"There didn't seem to be any limitation to the amount of burglary [proposed]," Sen. Symington told newsmen. A Senate source quoted the senator as saying in a closed Armed Services Committee session, "This is the most fantastic document I've ever read."

The author of the intelligence-gathering proposal, Sen. Symington said, is Tom Charles Huston, a former assistant White House counsel and speech writer. The senator disclosed the existence of the written proposals after listening to Mr. Huston testify for about two hours yesterday afternoon.

He said he had obtained copies of memoranda containing the proposals on Saturday and called Mr. Huston to the committee because the documents had been signed by him. Sen. Symington would not say how he obtained the memoranda.

Sen. Symington refused to disclose details of the intelligence-gathering plan, saying that to do so would have an "adverse impact" on national security because it would disclose sources and methods used in legitimate U.S. foreign intelligence collection. But he said portions would be made public.

Mr. Huston, a former national chairman of the conservative-oriented Young Americans for Freedom, left yesterday's closed hearing without commenting to newsmen.

Sen. Symington said the ap-

EEC Fails to Set a Policy For Energy Talks With U.S.

By David Haworth

BRUSSELS, May 22 (IHT).—Common Market ministers were unable tonight to give a clear mandate to the commissioner for energy policy, Henri Simonet, on his discussions about the energy crisis he is scheduled to hold with officials in Washington next week.

Mr. Simonet, a Belgian, had hoped to go to America to explain the European Economic Community's unanimous views about the supply of oil to community countries and for so-called "crisis management" in case of a shortage. But today's meeting produced a confusing difference of emphasis, with the French doubting the extent of the need for cooperation with the United States and the West Germans arguing with the British about subsidies for coaking coal.

All the EEC countries agreed they should take account of the "legitimate aspirations" of the oil-producing countries and that there must be "secure and sufficient" supplies in the near future. But talks on the details of how this should be achieved were shelved.

Thus, the conclusion of the meeting amounted to little more than an endorsement of a mission to learn U.S. thinking on the energy crisis.

Lack of Coordination

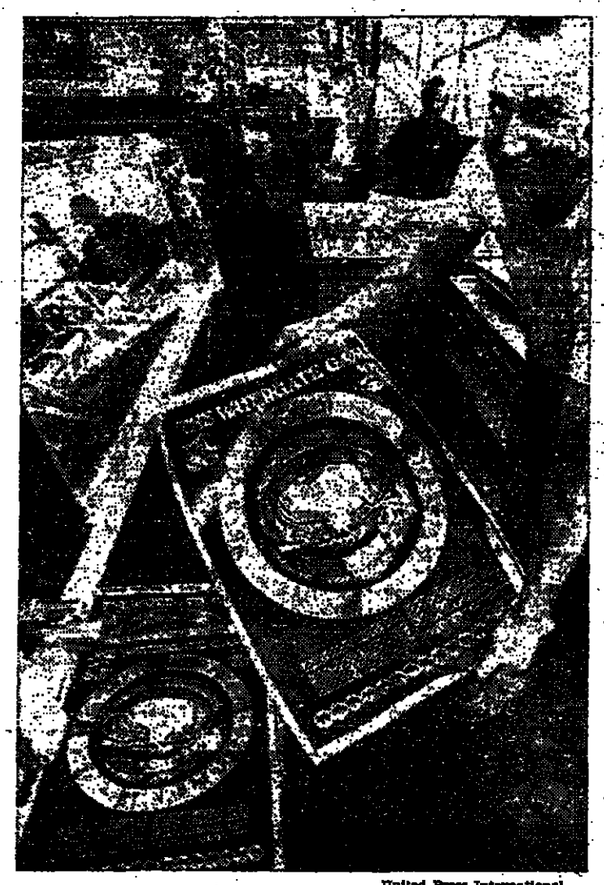

The ministers admitted that full EEC coordination on energy could not be achieved for the moment. While all were agreed that there should be measures to decrease the risks to oil supply, there was no unanimity about how this should be achieved.

The Common Market's main concern is that there should not be a race between the industrialized countries for the existing supplies of oil, but there were no firm proposals among the nine member states about how this could be avoided.

All agreed that this competition was increasing and that the Middle East producing countries would soon be in a position to dictate terms to the developed countries about how much oil they should get and at what price.

For this reason, they said a dialogue between the producing and consuming countries was needed and, perhaps, a reorganization of the internal EEC market. It was also stressed that there should be a greater concentration on nuclear projects and that the Common Market should set up a research committee to study the prospects of coal as a stable fuel supply for Western Europe.

It was also discussed whether investment policies should belong to the oil companies themselves or whether the EEC should establish a system which would guarantee investments by Common Market oil producers in third countries against political and economic risks.

United Press International.

PLAYING BY THE RULES—One of the many things that the Watergate affair has turned up is a new game based on the controversy. Above, a printer inspects some of the first run of 10,000 ordered by a New York advertising firm. It is equally a poster as well as a game, with a string of elephants at the bottom of the sheet cut as markers. A throw of the dice determines the moves that "start in the White House and end in jail."

Pompidou, Heath End Talks With 'Broad Agreement'

(Continued from Page 1)

tion on "this scheme on which the Americans already are changing." Neither the French nor British showed any liking for the name "new Atlantic charter."

The idea for an Atlantic summit this fall was ruled out. British sources said there was "always political anxiety about raising expectations that can't then be fulfilled." Both Washington and Bonn had floated tentative feelers about the possibilities of a U.S.-EEC summit this fall during Mr. Nixon's European trip.

As in their two previous tête-à-tête meetings, at Chequers a year ago and two years ago here, the two leaders showed their extremely similar pragmatic style in dealing with difficult questions. The French, who have been visibly unhappy with the continued float of the pound sterling, said nothing today other than that Britain had agreed it would eventually end. The British, who in previous declarations had warmly received the new Atlantic charter and showed no visible hostility to the Atlantic summit idea, today bowed to the French.

Britain agreed to abide by the rules of the EEC's common agriculture policy, and France in turn indicated this would aid development of the community's regional policy, firmly backed by Britain.

Mr. Pompidou and Mr. Heath agreed that a common EEC position on the trade talks should be formally adopted by July 1, and that the world talks should then get under way "as scheduled" in Tokyo in September.

They agreed that there should be no link whatsoever between the trade talks, which will be among members of the General Agreement on Tariffs and Trade, and the monetary talks, among International Monetary Fund members.

They agreed that the coming Atlantic negotiations should not be mixed, and that trade, monetary and defense matters should be kept separate. Henry A. Kissinger, Mr. Nixon's national security adviser, has called the three areas "linked by reality" and "linked conceptually."

There was agreement today that the coming trade negotiations should be "based on reciprocity." The French spokesman explained that by this they meant "global reciprocity of both industrial and agricultural commerce" as a basis for the talks—something the United States also strongly favors.

For the monetary negotiations, both countries favor extending the usage of special drawing rights to take the place of dollars as official reserves. But the French spokesman defined Mr. Heath's position as "more flexible" than the French position. He said that the real difficulty would be to find an "anchor" for SDRs, or in other words, to define their relation to gold.

Challenges by Ellsberg Delay Senate Action on Richardson

(Continued from Page 1)

responsibility for ordering a September, 1971, break-in at the office of Mr. Ellsberg's psychiatrist.

He also was closely questioned about a call he had received the previous day from John D. Ehrlichman, suggesting that he meet with Mr. Krogh because Mr. Krogh had information about political espionage. On the day of the call, April 30, President Nixon announced the resignation of Mr. Ehrlichman as his domestic affairs adviser and Mr. Richardson's nomination to become attorney general.

Mr. Richardson, now secretary of defense, told the committee in response to some questions that he would have to check his records further before giving his answers. He said he would have the information for a later session.

Sen. Kennedy said that Mr. Ellsberg early this morning got in touch with him and others about apparent inconsistencies between Mr. Richardson's sworn testimony to the panel and the affidavit filed by Mr. Krogh with the court in the Pentagon papers case. The judge declared a mistrial in the case on May 11, throwing out the government's prosecution of Mr. Ellsberg and Anthony J. Russo, because of government misconduct.

Sen. Byrd, the assistant majority leader of the Senate, also told newsmen that Mr. Ellsberg had contacted his office.

Mr. Ellsberg was among the spectators at the surprise reopening of the Richardson hearings.

The committee had been in closed session for about an hour when Mr. Richardson suddenly appeared and was ushered into the room. A few minutes later the committee announced that its public hearings would be resumed.

Sen. John V. Tunney, D., Calif., opened the questioning by asking Mr. Richardson to describe once again the conversation he had on April 30 with Mr. Ehrlichman.

Mr. Richardson said that Mr. Ehrlichman called him to say that Mr. Krogh would like to see him and that he had what Mr. Ehrlichman thought was "worthwhile information to give him."

Mr. Krogh, during his White House employment, headed a group known as the Plumbers, which was assigned to run down and plug leaks of national security information.

Mr. Richardson testified that Mr. Ehrlichman told him that Mr. Krogh had information about "an aspect of the overall situation I ought to know about."

As he had before, Mr. Richardson said that Mr. Krogh gave him a summary of his role in the break-in at the Ellsberg psychiatrist's office and said he was concerned about what disclosure he should make, to whom and whether he could do so without compromising national security.

Mr. Richardson said he told Mr. Krogh that he couldn't advise him but he agreed with Mr. Krogh's feeling that the public interest in disclosure outweighed the national security aspects.

Mr. Krogh later filed his affidavit in the Pentagon papers case.

Nixon Aide Proposed Spying On Embassies and Break-ins

(Continued from Page 1)

parent thrust of the plan was to increase the espionage roles of the Central Intelligence Agency and the Defense Department within the United States.

He emphasized that the burglary plans contained in the memoranda did not include Watergate or the Beverly Hills office of Pentagon papers defendant Daniel Ellsberg's psychiatrist. He said he does not know if any burglaries were actually carried out as a result of Mr. Huston's proposals.

Sen. Symington also said there were no specific plans for burglarizing or spying on political candidates; they went only so far as to characterize the purpose of the plans as "breaking in places for domestic intelligence."

The suggestions contained in the memoranda, however, touched off disagreements between the major intelligence agencies, Sen. Symington said.

He said that because Mr. Hoover was insistent that his agency not become involved in foreign intelligence operations, the White House plans created "quite a bit of disagreement." Sen. Symington apparently was alluding to the suggestions of breaking into embassies. Also, Sen Symington said, Mr. Hoover was anxious to retain all domestic intelligence activities within the FBI, while the White House officials were making approaches for such assistance to the CIA.

The senator said the first set of memoranda bearing Mr. Huston's name was provided to the Armed Forces Committee Wednesday by intelligence officials of the Defense Department, the FBI and other agencies who, he said, had sought guidance in determining which portions had national security implications.

He said the documents obtained last week were among those former White House counsel John Dean 3d had kept locked in a bank safety deposit box and which U.S. District Judge John J. Sirica ordered released to the Senate Select Committee investigating Watergate.

Sen. Symington said his committee—at the request of Pentagon and other intelligence groups—will meet tomorrow with White House officials to discuss the "complicated legal and substantive job" of determining which portions of the memoranda affect national security.

New Sartre Newspaper

PARIS, May 22 (Reuters).—A new left-wing daily newspaper, called Liberation, appeared here today with philosopher and writer Jean-Paul Sartre as its managing editor. The paper, which had no advertising in its eight-page format, said in an editorial that it wanted to be the spokesman of ordinary Frenchmen.

Nixon Cites National Security Interests

(Continued from Page 1)

possible criminal conduct or discussions of possible criminal conduct, in the matters presently under investigation, including the Watergate affair and the alleged cover-up."

Much of Mr. Nixon's major statement dealt with national security considerations, ranging from publication of the Pentagon papers to leaks to newsmen of accurate information about highly classified subjects.

"In citing these national security matters," he said, "it is not my intention to place a national security cover on Watergate, but rather to separate them out from Watergate—and at the same time to explain the context in which certain actions took place that were later misconstrued or misused."

In explaining his move to block the FBI from probing CIA operations in connection with its Watergate burglary investigation, Mr. Nixon said that within a few days of the June 17 break-in at Democratic offices in the Watergate, "I was advised that there was a possibility of CIA involvement in some way."

Mr. Garment, when asked who conveyed such a suggestion to Mr. Nixon, said that the event is now "many months removed" and that the President's statement was as precise as he could make it at this time.

In the statement, Mr. Nixon continued:

"It did seem to be possible that, because of involvement of former CIA personnel and because of some of their apparent associations, the investigation could lead to the uncovering of covert CIA operations totally unrelated to the Watergate break-in."

In addition, he said that the name of E. Howard Hunt jr. had been connected with the burglary and the President had been alerted to the fact that Hunt previously had been a member of the Plumbers group. Hunt pleaded guilty in January to all Watergate charges against him.

Mr. Nixon said: "I was also concerned that the Watergate investigation might well lead to an inquiry into the activities of the special [Plumbers] investigation unit itself."

The chief executive said that once the existence of the Plumbers became known, he felt that it would lead inexorably to a discussion of matters "some of which remain, even today, highly sensitive."

Key Passage

In what observers consider a key passage, the President said:

"I wanted justice done with regard to Watergate; but in the scale of national priorities with which I had to deal—and not at that time having any idea of the extent of political abuse which Watergate reflected—I also had to be deeply concerned with "insuring that neither the covert operations of the CIA nor the operations of the special investigations unit should be compromised. Therefore, I instructed Mr. Haldeman and Mr. Ehrlichman to insure that the investigation of the break-in not expose either an unrelated covert operation of the CIA or the activities of the White House investigations unit . . ."

Mr. Nixon said that he told Mr. Haldeman and Mr. Ehrlichman to make certain that the matter was personally coordinated between Mr. Gray and Army Gen. Vernon A. Walters, deputy director of the CIA.

Mr. Nixon, in addition to disclaiming any advance knowledge of a Watergate cover-up, also declared that "neither, until after I began my own investigation, was I aware of any fund-raising for defendants convicted of the break-in at Democratic headquarters, much less authorize any such fund raising."

"Nor did I authorize any offer of executive clemency for any of the defendants," he added.

Indirectly defending his Aug. 29 news conference statement that no one then employed by the White House had a Watergate involvement, Mr. Nixon said:

"In the weeks and months that followed Watergate, I asked for, and received, repeated assurances that Mr. Dean's own investigation (which included reviewing files and sitting in on FBI interviews with White House personnel) had cleared everyone then employed by the White House of involvement."

Pentagon Papers Case

The President said that the Pentagon papers were leaked to the press when the administration was engaged in delicate negotiations involving Vietnam, China, the Middle East, nuclear arms limitations, and U.S.-Soviet relations. He said the threat arose that "other governments no longer knew whether they could deal with the United States in confidence," and the Plumbers group was formed and put under the supervision of Mr. Ehrlichman, with Egil Krogh subsequently placed in charge.

Mr. Nixon said that when Daniel Ellsberg was identified as the person who had leaked the Pentagon papers, "I told Mr. Krogh that, as a matter of first priority, the unit should find out all it could about Mr. Ellsberg's associates and his motives," but "I did not authorize and had no knowledge of any illegal means to be used to achieve this goal."

Sentenced in Dahomey

COTONOU, Dahomey, May 22 (Reuters).—A former Dahomey chief of state, Col. Alphonse Alley, has been sentenced to 20 years solitary confinement with hard labor by a court-martial for his part in a plot discovered here last February, it was announced today.

Mr. Nixon said that he was assuming responsibility for, in effect, the burglary of the office of Mr. Ellsberg's psychiatrist because he could understand that the emphasis he placed on the crucial importance of protecting national security could have caused associates to feel "justified in engaging in specific activities that I would have disapproved had they been brought to my attention."

On April 17, he went on, Attorney General Richard G. Kleindienst, since resigned, informed him that the government had clear evidence that Hunt—a member of the Plumbers—was involved in the break-in at the office of Mr. Ellsberg's psychiatrist. Said Mr. Nixon:

"The attorney general believed that despite the fact that no evidence had been obtained from Hunt's acts, a report should nevertheless be made to the court trying the Ellsberg case. I concurred and directed that the information be transmitted to Judge [William Matthew] Byrne immediately."

On May 11, Judge Byrne threw out the government's case against Mr. Ellsberg, citing the burglary as government misconduct.

In what amounted to a summary statement, Mr. said that news accounts out of Watergate testimon given grossly misleading sions of many of the f they relate both to my o and to certain unrelated ties involving national s

"Already," he went on, basis of second and thi hearsay testimony by either convicted or th under investigation of t I have found myself ac involvement in activities heard of until I read ab in news accounts."

Summary of Nixon's Statement

WASHINGTON, May 22 (AP).—*This is a summary issued by the White House of President Nixon's statement on the Watergate scandal:*

Recent news accounts growing out of testimony in the Watergate investigations have given grossly misleading impressions of many of the facts, as they relate both to my own role and to certain unrelated activities involving national security.

Already, on the basis of second- and third-hand hearsay testimony by persons either convicted or themselves under investigation in the case, I have found myself accused of involvement in activities I never heard of until I read about them in news accounts.

These impressions could also lead to a serious misunderstanding of those national security activities which, though totally unrelated to Watergate, have become entangled in the case. They could lead to further compromise of sensitive national security information.

I will not abandon my responsibilities. I will continue to do the job I was elected to do.

In the accompanying statement, I have set forth the facts as I know them as they relate to my own role.

With regard to the specific allegations that have been made, I can and do state categorically:

1—I had no prior knowledge of the Watergate operation.

2—I took no part in, nor was I aware subsequent efforts that may have been m cover up Watergate.

3—At no time did I authorize any o executive clemency for the Watergate defe nor did I know of any such offer.

4—I did not know, until the time of m investigation, of any effort to provide the gate defendants with funds.

5—At no time did I attempt, or did I as others to attempt, to implicate the CIA Watergate matter.

6—It was not until the time of my i vestigation that I learned of the break-in office of Mr. Ellsberg's psychiatrist, and I cally authorized the furnishing of this i tion to Judge Byrne.

7—I neither authorized nor encouraged dinates to engage in illegal or improper ca tactics.

In the accompanying statement, I have to provide the background that may place allegations in perspective. I have spe stated that executive privilege will not be as to any testimony concerning possible c conduct or discussions of possible crimi duct, in the matters under investigation the public to learn the truth about and those guilty of any illegal actions to justice.

Caulfield Lays Clemency Offer to Deal

(Continued from Page 1)

"I was doing a great service for the President of the United States" by offering clemency to McCord.

McCord returned to the witness stand twice today, testifying before and after Mr. Caulfield.

He said that he was so angered by "a ruthless attempt" by the White House to blame the CIA for the Watergate burglary that he sent a letter to Mr. Caulfield promising: "Every tree in the forest will fall. It will be a scorched desert."

The letter was "couched in strong language," McCord said, "because it seemed to me at the time that this was the only language the White House understood."

He said the letter was not an attempt to get the White House to keep him out of jail.

"I was trying to head off an effort falsely to lay the Watergate operation off on CIA," McCord said.

Before joining the Committee for the Re-election of the President in early 1972, he had served 19 years with the CIA.

He said that twice last December it was suggested that he claim CIA sponsorship for the June 17 break-in.

"This would have had the effect of clearing the Committee for the Re-election of the President and the White House of responsibility for the operation," said McCord.

He said the events "smacked of the situation which Hitler's intelligence chiefs found themselves in [when forced] to tell him what they thought he wanted to hear."

McCord said he had been told through his lawyer, Gerald Alch, that others wanted him to contend at his trial that the CIA was behind the wiretapping and burglary. But at a hastily called news conference, Mr. Alch denied this. He said he would ask the committee to let him testify, he hopes tomorrow, about his version of what happened.

Wiretapped Calls Cited

The New York Times said today that McCord had made token telephone calls in December to the Israeli and Chilian Embassies in Washington, which he knew from his days as a CIA official to be wiretapped by the FBI. The sources said he later demanded that White House officials prevail on federal prosecutors to concede that he had been overheard on an illegal wiretap and dismiss the charges against him.

"He wanted the government to come in and say it had overheard him," one source said. "He told Caulfield that's the way he wanted it done."

McCord conceded today that he had deliberately made the two telephone calls to the foreign embassies, but he denied that this was a ploy to undermine the government's case against him.

McCord said he made the calls to test the government's honesty. He was convinced that his own telephone had been illegally wiretapped, he said, but believed the government would probably deny it if asked about it in court.

He said he tried to be overheard on other taps on embassy telephones to see if the government would admit overhearing him there. He said it didn't.

Fear of Violence

He said that part of his motive in wiretapping the Democratic National Committee offices last year was a fear of violence directed against the Nixon campaign. He said he had been told that the Vietnam Veterans Against the War were planning violence against the Republican convention, and that the group had offices inside Democratic headquarters in Watergate.

He also said he couldn't recall receiving any classified information from his contacts with the Justice Department's Internal Security Division. He had said Friday that he received almost daily reports from that division while he was employed at the Nixon committee.

Other testimony by McCord indicated that the Nixon re-election committee may have concealed campaign contributions received from billionaire Howard Hughes.

McCord quoted fellow conspirator G. Gordon Liddy as saying a "Howard Hughes plane" had been lined up for the escape of a burglary team.

He said he did not know if what Liddy outlined to him as a planned break-in at the office of a Las Vegas, Nev., newspaper publisher ever occurred or whether the plane eventually was used.

Later, publisher H.N. Greenspun of the Las Vegas Sun told a press conference that his office was burglarized in August, 1972, two months after the Watergate break-in and the arrest there.

He added that the testimony linking Mr. Hughes to the Watergate affair could embarrass Archibald Cox, selected by the government as special Watergate prosecutor.

The reason is that Mr. Cox's brother Max is Mr. Hughes's general counsel, Mr. Greenspun said.

Mr. Greenspun put forward the theory that the aim of the burglars of his office was documents he possesses Hughes's political plan plans were kept in a sa the burglars failed to o

McCord told the comm had heard that E. How jr., another Watergate tor, had handled a contribution from Mr. whose money has figure vious campaigns by Mr.

"Gordon Liddy told m ruary, 1972, that he, too a Howard Hughes check, a donation to campaign," McCord sai is the extent of my kno this matter."

McCord also testifi former White House Stuart Magruder "c perjury" at the Januar gate trial.

He said that he did nc story before because he think he could get a f in January.

Perjured Testimo

"There was perjured tes McCord said. "That was Magruder."

Mr. Magruder was campaign manager at t of the Watergate break- recently resigned as ass the commerce secretary.

Minority counsel F Thompson interrupted t that McCord was speakin basis of what Liddy t him.

"Yes, sir," McCord s

2d Dean Order Rep

Federal sources have it was Mr. Dean who the payment of about the arrested men and t Liddy and Hunt jr., mately became defendan Watergate trial.

Kissinger Not Quitting His Job, White House Says

WASHINGTON, May 22 (UPI).—Presidential adviser Henry A. Kissinger has no intention of quitting his post, the White House said yesterday.

Deputy Press Secretary Gerald L. Warren gave the response to questions about reports that Mr. Kissinger had offered to resign after disclosures that he at least acquiesad to the wiretapping of telephones of members of his National Security Council staff a few years ago.

"As far as we know," Mr. Warren told reporters, "Dr. Kissinger has no such intention."

The President's chief foreign policy adviser has been pictured by close associates as deeply disturbed by recent revelations on national security wiretapping which have been indirectly linked to the Watergate scandal.

Channel Decision Expected in July

PARIS, May 22 (Reuters).—A decision to go ahead with a Channel tunnel between Britain and France is likely to be taken by the two governments in July, a French spokesman said here today.

The Channel tunnel project was discussed by President Georges Pompidou and Prime Minister Edward Heath during their two days of meetings here. The spokesman said the two leaders agreed that the ministers dealing with the matter should speed up their work.

Forecasting a decision on the project this summer, the spokesman added: "There is every reason to think that this favorable decision could be taken in July."

Drug Haul at Heathrow

LONDON, May 22 (UPI).—Customs officers today discovered 600 pounds of cannabis hidden in four crates stored at Heathrow Airport. The discovery was made when the customs men decided to investigate the crates because no one had claimed them. Police said the consignee address was false.

lic Minister Accuses ... 'Serious Aggression'

Dispatches

ay 22.—Britain's warships to protsels inside Iceuit of 50 nautical of "serious agi's Fisheries Minisson said today. serious thing to ject for resolving tion is getting e," he said at row Airport beReykjavik for a topped at Heathplanes en route Switzerland. what Britain is e by sending in e I'm sure they more fish," he think they can ."

Ministry said toish trawlers had ier naval protecelandic limit for it any incidents

denied that his Moscow was made on of purchasing use in the "cod hat he had nothut the trip at

newspaper today Premier Olafur saying that Ice-

land tried to lease a gunboat from Poland to strengthen its coast guard, but the attempt was unsuccessful.

In an interview with the Berlingske Tidende, Mr. Johannesson said approaches had been made to Poland and some other countries, but without any positive response.

The premier also said that Iceland was counting on Denmark's support when the dispute is brought before the NATO Council in Brussels, perhaps within the next few days. Iceland, Britain and Denmark are all NATO members.

Mr. Johannesson said he could not comment definitely on whether the conflict, which erupted when Iceland unilaterally extended its fishing limit from 12 to 50 miles last September, would affect Iceland's NATO membership.

But he said that "this cannot be excluded. It is clear that the conflict will influence public opinion in Iceland."

Diplomatic sources in London said the cod war was discussed in a meeting of the NATO Council yesterday. One unidentified NATO member reminded the meeting that since 1956 the alliance has had machinery for mediating disputes between members.

There was no suggestion, however, that this machinery be used yet, the sources added. Both Iceland and Britain would have to agree to NATO mediation first and neither has requested help yet.

In Oslo, the Foreign Ministry announced in a brief statement that the Norwegian government today made official contacts with the British and Icelandic governments to find out if Norway can help to solve the fishing dispute. Norway is also a member of NATO.

Pressure mounted in Iceland, meanwhile, for tougher countermeasures against the dispatch of British naval vessels to Iceland waters. Iceland has already recalled its ambassador in London for consultations and banned British military aircraft from using the Keflavik Airfield.

Today, the Cabinet, the Foreign Relations Committee of the Althing (parliament) and political parties held meetings. No decisions from the cabinet meeting were announced.

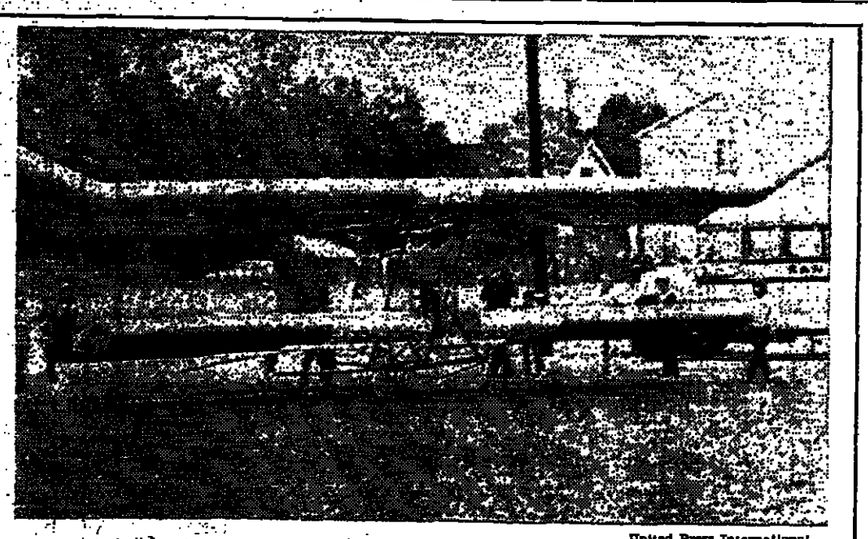

Leaders of the Communist People's Alliance, one of the three parties in Premier Johannesson's coalition government, said they would urge Iceland to quit NATO.

They said they would also demand the immediate withdrawal of United States forces from the Keflavik Airfield.

Anti-NATO groups in Iceland have seized on the British naval intervention to step up their opposition to membership in NATO and the presence of the American base at Keflavik. A protest meeting was planned at Keflavik to demand the immediate withdrawal of the 3,200 U.S. Navy and Air Force men in the base.

The leader of the pro-NATO opposition Social Democratic party, Benedikt Grondal, said today: "It is astonishing and condemnable that the British are using naval forces as coercion against us."

The leader of the opposition right-wing Independence party, Geir Hallgrimsson, predicted: "We shall charge Britain before the NATO Ministerial Council, and we are studying whether it would be right to accuse Britain of aggression before the United Nations Security Council."

United Press International.

BOYS OF A FEATHER...—Student-built biplane with wing span of 36 feet, undergoing first taxi tests on grounds of San Gabriel, Calif., elementary school this week. Above, one of the students provides power by pedaling modified bicycle which turns 7 1/2-foot propeller. Plane was built by 41 eighth-graders and their instructor. No one knows for sure whether it will take off or, more important, how it will land.

Airlines Take Fares Survey

GENEVA, May 22 (UPI).—Airlines flying the North Atlantic will make a one-year survey of passengers starting next month to find out what the customer likes, the International Air Transport Association said today.

Approximately 75,000 passengers on scheduled flights and a further 10,500 charter passengers will be given in-flight questionnaires, it said.

The resulting computerized data, IATA said, will help airlines fix future pricing policy by knowing how the customer feels about various features offered at different fares.

Bill to Limit War Powers Of President Gains in House

WASHINGTON, May 22 (AP).—A 120-day deadline on a President's power to commit U.S. troops abroad without Congress' specific approval was supported by the House Foreign Affairs Committee today, 25 to 7.

But after backing that key provision, the committee put off final action on its war powers bill—and an effort to attach a Cambodia bombing fund cut-off—until at least next week.

Under terms of the bill, a president would be required to report estimated costs, authority and scope of his war commitment to Congress within 48 hours and the 120-day deadline for Congress' approval of the commitment would start then.

A similar bill—but one setting the deadline at 30 days instead of 120—was approved by the Senate Foreign Relations Committee last Thursday. Also unlike the Senate bill, the House would not spell out the specific emergency conditions under which a President could commit U.S. forces to combat.

Amendment Rejected

In voting today, the House committee rejected an amendment offered by Rep. Peter H. B. Frelinghuysen, R., N.J., to strike out both the 120-day deadline and another provision that Congress could halt the war commitment any time during the 120 days with a bill the President could not veto.

Mr. Frelinghuysen contended that a minority of members of either the House or Senate could force a President out of a war commitment "no matter how right his action" by simply preventing Congress from approving it for 120 days.

"This surely would encourage an enemy to spin out 120 days knowing the President then will have no authority," Mr. Frelinghuysen said.

But Rep. Donald M. Fraser, D., Minn., said the 120-day deadline would reassert Congress' control over war commitments. He accused Rep. Frelinghuysen of arguing that "a President should have a free reign to commit troops anytime in any part of the world with Congress having nothing to say about it."

Rep. Jonathan B. Bingham, D., N.Y., said he would attempt to attach a provision that would cut off funds for bombing in Cambodia.

Mr. Bingham said he would introduce the amendment because "we should take every opportunity we can find to cut off any further expenditure for the war."

But committee leaders say they believe the war fund cut-off would carry the broader war powers bill to defeat in the House and said they might try to shuffle Rep. Bingham's amendment off to a subcommittee.

Senate Overrides Nixon Veto On Appointing Fiscal Chiefs

By Spencer Rich

WASHINGTON, May 22 (WP).—The Senate voted 86 to 22 today to override President Nixon's veto of legislation requiring Senate confirmation of the director and deputy director of the Office of Management and Budget.

The bill is an attempt to bring under congressional control what the bill's sponsor, Sen. Sam J. Ervin jr., D., N.C., calls two of the most powerful offices in the federal government.

President Nixon vetoed it last Friday on grounds that it would encroach on White House prerogatives and also force the dismissal of the present incumbents, Budget Director Roy Ash and Deputy Director Frederick Malek, who would then have to be reappointed subject to Senate confirmation.

Today's vote was the first this year in which either chamber of Congress has produced the two-thirds majority needed to override a presidential veto. Two earlier attempts to break a veto failed this year.

It was also the first vote of this type since the Watergate scandal assumed major proportions, but how much influence the Watergate affair had on the Senate vote is unclear. Different versions of the same measure also passed by overwhelming margins in the Senate in February and early this month, before the Watergate investigation became a major public issue.

The bill now goes to the House, which must approve it by the required two-thirds in order for it to become law over the President's signature.

House Speaker Carl Albert, D., Okla., said the House vote will be taken tomorrow. He said "it will be difficult" to achieve the needed margin in the House, which initially passed the measure May 3 by a 229-to-171 vote—far less than two-thirds.

If the bill gets substantially more House support this time, it may be a sign that the Watergate affair has made deep inroads on President Nixon's legislative strength, although many other issues are involved in the vote as well.

Skylab's Crew May Drop Plan To Repair Power

HOUSTON, May 22 (Reuters).—Skylab commander Capt. Charles [Pete] Conrad may not, after all, try to restore the space station's damaged power system and the crew may have to settle for a restricted mission, it was disclosed today.

The space agency, perhaps because of the dangers involved, has backed away from the plan for the astronauts to attempt to prod open a jammed wing of the solar energy panels when they fly up to rendesvous with Skylab on Friday.

John Disher, deputy director of the program, told reporters this procedure was not being written into the revised flight plans now being drawn up for the mission.

Two wings of solar panels on the side of the spacecraft failed to extend after the launch eight days ago. Mr. Disher said that if it looked a simple job to extend the remaining wing by use of a pole, then the crew might do it—but probably not on the first day and possibly not until much later.

Loss of the solar panels has robbed Skylab of about half its electrical power. If they cannot be repaired, the crew will draw power from the fuel cells in the Apollo spacecraft they are to use as a ferry.

Gay-Nuptial Minister Urged to Take Leave

BOSTON, May 22 (Reuters).—Methodist Church leaders have recommended a year's leave on mental health grounds for the Rev. William Alberts, who performed the marriage of two male homosexuals here last month.

Mr. Alberts, minister of the Old West Church for eight years, also was urged to undergo examination by a panel of three psychiatrists. The recommendations by the board were similar to those made earlier by Bishop Edward G. Carroll who, however, has denied that his allegations of paranoia and mental illness were directed at the minister because of the homosexual wedding.

Mr. Alberts has rejected the proposal of a psychiatric examination unless he can choose two, not one, of the psychiatrists. He also has said that he will not accept a leave of absence as the board recommends.

30 Killed as Indian Troops Try to Disarm State's Police

NEW DELHI, May 22 (AP).—Indian Army troops put down two armed rebellions by Uttar Pradesh state policemen today that left at least 30 men dead.

Officials said 15 men were killed in each of two major clashes, one of which lasted late afternoon. There was an unconfirmed report of a brief firefight tonight at Lucknow, the Uttar Pradesh capital, when soldiers stormed the state police armory. Injuries were reported on both sides.

Men of the force, called the Provincial Armed Constabulary (PAC), and army troops apparently remained at a standoff in three other towns where PAC constables were refusing orders to surrender control of their armories.

A Home Ministry spokesman said, however, that the only shooting incidents were at Kanpur, an industrial city 240 miles southeast of New Delhi, and Ramnagar, a town near Banaras, 415 miles southeast of the Indian capital.

Surrender Reported

The clash at Kanpur, where heavy fighting lasted about two hours, took the lives of 13 PAC constables and two soldiers. At Ramnagar, 11 soldiers, a PAC officer and two mutineers were killed, according to official reports. By tonight, the rebels were said to have surrendered.

The incidents were sparked by predawn army raids, made at the request of the state government, on 10 PAC armories to disarm the 30,000-man force.

The Home Ministry said the state government decided to move against all the PAC armories after some constables joined agitating students at Lucknow University, where the PAC was deployed to maintain order. Students went on an arson rampage yesterday, destroying many campus buildings, and the ministry spokesman said it was thought that some of the rioting was instigated by PAC constables.

The spokesman blamed the PAC revolt on labor problems.

But he denied that there was a police rebellion under way, choosing to characterize the incidents as "indiscipline of a sizable number in the [Uttar Pradesh] armed constabulary."

"I suppose each case where the PAC refused to surrender the armory constituted an individual case of mutiny," the spokesman said. "But it is not anyone's assessment that the whole lot of them is affected, and the other branches [of the police] are not at all involved."

Dam Bursts in Utah

PAYSON, Utah, May 22 (AP).—One of four dams in Payson Canyon burst last night, sending a four-foot-high wall of water rushing into this central Utah town of 4,500. No injuries were reported, although an estimated 500 to 600 homes were damaged by water and every store on Main Street was flooded. City and civil defense officials had enough time to evacuate those living in the canyon and near its mouth after the dam broke.

Saigon Move Rebuffed

Cambodian Rebels Cut Road Linking Phnom Penh to Port

PHNOM PENH, Cambodia, May 22 (AP).—Rebel troops have cut an eight-mile stretch of Highway 4, Cambodia's lifeline to the sea, halting all truck traffic carrying supplies to Phnom Penh, the high command said today.

A battle on the road to the country's only deep-water port of Kompong Som forced cancellation of a large truck convoy scheduled to leave Phnom Penh before dawn tomorrow to pick up supplies there.

Cambodia's ailing President Lon Nol flew to Kompong Som Sunday for 10 days' rest. Communist troops cut the road 15 miles to the north and there was said to be no danger to the port itself.

The command said the towns of Bateay Prey and Prey Nop just off Highway 4, 15 miles outside of Kompong Som, were evacuated yesterday as insurgent forces approached. Five government soldiers were killed in Prey Nop, the command said.

U.S. Planes in Action

Government reinforcements immediately launched an operation to retake the stretch of highway between Veal Rinh and Chamnar, 110 miles southwest of Phnom Penh. Spokesmen said U.S. fighter support was called in.

Since late 1970, truck convoys traveling the 147-mile stretch from Kompong Som to Phnom Penh have kept the capital alive with food, ammunition and other vital supplies.

Highway 4 has been the only one of five major roads leading to Phnom Penh open to commercial traffic since the current Communist offensive began in early April. It, too, was closed briefly on April 5.

In other action, the command said government troops continued, "with success," their attempts to dislodge insurgent forces from Highways 3 and 5. The command also reported that government troops today recaptured Doeum Rokar, a hamlet south of Phnom Penh that rebels had taken six days ago.

Information Minister Sum Chhum said today the president had no plans to leave the country and said reports that he was to go to the United States for medical treatment were "speculation."

Reds Reject Saigon Plan

SAIGON, May 22 (Reuters).—South Vietnam today put forward a new plan to make the cease-fire workable, but it was immediately rejected by the Viet Cong because it would have involved the United States and North Vietnam.

The South Vietnamese military spokesman said the aim of the seven-point plan was to break the deadlock in the military negotiations on implementing the truce. It called for a joint appeal from all four former belligerents to stop the fighting, a standstill of all armed forces in the South, the delineation of areas of control, meetings of field commanders in contested areas and the settlement of other disputed topics.

A spokesman for the Viet Cong's Provisional Revolutionary Government delegation said his group energetically rejected the plan. It was unreasonable and illogical, he said, to propose a joint appeal with U.S. and North Vietnamese participation when the Paris agreement specifically made the two South Vietnamese parties solely responsible for the cease-fire after the U.S. withdrawal.

Coca-Cola Agent Is Kidnapped

CORDOBA, Argentina, May 22 (UPI).—The head of a Coca-Cola bottling plant here was kidnaped by two armed men yesterday when he returned home from work, police said.

It was the 47th kidnapping reported in Argentina this year.

Police sources said Oscar Castells, an Argentine citizen who is president of INTI, the soft drink company's bottling firm in this city, was stopped by two men near his home and forced into a pickup truck at gunpoint.

There was no immediate word if Mr. Castell's kidnappers were leftist guerrillas, who have been blamed for many of the earlier kidnappings. Six other victims of this year's abductions are still being held captive.

Sore Loser Can't Resist

REDDING, Calif., May 22 (AP).—A baseball fan fired 17 rifle bullets into his television set, telling police he was angry because the San Francisco Giants lost a televised game.

Gerald Bishop, 42, was arrested Sunday. The police said some bullets penetrated the wall of his mobile home and hit that of an elderly woman, Lula Jorgenson, 200 yards away.

Mr. Bishop was booked for investigation of shooting at an inhabited dwelling and malicious mischief. The latter charge came after police said he kicked out the back window of a police car taking him to jail.

To the police question: why? Mr. Bishop countered: Haven't you ever wanted to shoot your TV set?"

Kissinger Aide Leaves Paris For Saigon as Talks Go On

By Jonathan C. Randal

PARIS, May 22 (WP).—Henry A. Kissinger's top aide flew to Saigon tonight amid indications that problems requiring concessions from South Vietnamese President Nguyen Van Thieu have arisen in the private talks here on strengthening the Vietnam cease-fire.

The departure of William Sullivan, deputy assistant secretary of state, was originally announced, then partially retracted by Hanoi's Deputy Foreign Minister Nguyen Co Thach before being officially confirmed.

For reasons unexplained for more than two hours, the U.S. Embassy here declined to confirm or deny Mr. Sullivan's departure aboard a U.S. Air Force jet which had arrived earlier at Orly Airport from West Germany.

Speaking after a 6-hour and 15-minute meeting between Mr. Kissinger and Hanoi's Le Duc Tho, their longest since negotiations resumed Thursday, Mr. Thach appeared to cast doubt on the presidential adviser's laconically optimistic statement yesterday that "some progress" had been made.

"That may be his impression," Mr. Thach replied. "As far as we're concerned, we cannot say that yet."

Although the two principals have met for a total of 24 hours—and their experts in separate sessions for nearly 20—another Kissinger-Tho meeting was scheduled for tomorrow.

Despite Mr. Thach's pointed remark—and the fact that the talks were clearly taking longer than the three or four days originally suggested by the United States—observers speculated that some progress must have been made if only because typewriters were moved into the Communist-owned villa at Gif-sur-Yvette for today's meeting.

Moreover, recurring rumors suggested that the two sides may have agreed to apply the January 27 cease-fire "correctly," a word which was said to imply not only an end to military violations, but a beginning of a "wind of liberalization" by the Saigon regime.

Mr. Sullivan's trip was interpreted in this light to mean that the United States wanted President Thieu to ease up and implement the January agreements while still remaining in power and avoiding any significant weakening of his hold in the country.

Concessions in both the military and political fields by Saigon, moreover, could help persuade North Vietnam to bring pressure to bear in Cambodia for a compromise settlement between Marshal Lon Nol's beleaguered regime and the insurgents.

On this score it was noted that Sonn Sann, a Paris-based former Cambodian bank governor with good connections with both the Phnom Penh government and Prince Sihanouk, recently returned to the Cambodian capital on a "special mission."

Meanwhile, Mr. Kissinger met this evening for the second time in a week with French Foreign Minister Michel Jobert. The late afternoon meeting was believed to have centered on next week's meeting between Presidents Nixon and Georges Pompidou in Iceland.

ater, on March 25, re Department rerlier decision, and raised price supports which, Mr. Nelson testified, were worth an additional $200 million in income to dairy farmers.

Asked where the decision to raise price supports was made, Mr. Nelson said: "To be very candid with you, we never figured this was [Agriculture] Secretary [Clifford M.] Hardin's decision. I don't think any secretary makes that decision. I think the White House makes the decision and it's announced through the secretary . . . I'm talking about any administration."

Money for Rep. Mills

In addition to backing Mr. Nixon, the co-ops gave Rep. Mills more than $39,000 for his campaign for the Democratic presidential campaign.

Mr. Nelson was closely questioned about the following key 1971 dates in the decision to raise milk price supports and his co-ops contribution of campaign gifts to the President: March 12—price increase rejected; March 22—$40,000 gifts to Nixon campaign; March 23—meeting with President; March 25—price support raised; July 9—$125,000 gifts to campaign by 50 checks for $2,500 each to dummy committees; Sept. 10—$62,500 campaign gifts by 25 checks for $2,500 each to dummy committees.

Although he said he could not recall any details, Mr. Nelson said the July and September contributions, with many checks to dummy committees, came as a result of fulfilling "commitments—there had been a previous conversation or conversations in which it was agreed that X number of dollars would be contributed" at the time and manner chosen by the Nixon campaign.

For Moscow, the Year of Europe

Mr. Brezhnev's visit to Bonn indicates that the United States is not the only great power to view 1973 as the "Year of Europe." The Soviet Union, too, has seen the currents tugging at West Europe's postwar moorings to Washington. Various Kremlin figures have personally cultivated various European countries in the past few years, and now the top man has made the first visit of any Soviet ruler to the country whose dark history and current strength have made it the center of Europe for both East and West. It is natural that much attention has been paid to the symbolic significance of the Brezhnev trip in healing the wound created by two German invasions of Russia in this century—a wound kept raw through decades of cold war. At the same time, it is necessary to try to see the current political significance too.

* * *

The Kremlin's first priority is surely to prevent West Europe—West Germany in particular—from becoming again a source of aggression or tension directed against the Soviet Union. The Kremlin wants this for its own sake and to keep Germany from becoming anew a bone of Soviet contention with the United States. The basic reason Mr. Khrushchev's visit to the United States in 1959 produced so few lasting results was because the "German problem" had not been resolved. Since then it has been. First, a Berlin agreement was made, ending use of that city as an East-West testing ground. Second, East Germany has been accepted in the West as a sovereign state: The goal of German reunification, embodying the West's refusal to acknowledge Soviet imposition of Communism in East Europe, has been formally abandoned. It was the solution of the German problem which permitted the Moscow summit to take place last year; Mr. Brezhnev is to return Mr. Nixon's visit next month. It also permitted Mr. Brezhnev to visit West Germany.

In going there, he no doubt intended to serve Moscow's "post-cold war" European policy of establishing the Soviet Union as a regular and legitimate participant in West European affairs. Some suspect the underlying Kremlin motive is to nail down its Western front while relations with China remain tense; others suspect the motive is to cajole Europe into easing out the United States. In any event, the Soviet Union has worked hard to normalize, and to put on a long-term basis, both political and economic ties with almost every country in West Europe. Trade is a particular consideration: Moscow seems eager to encourage Western competition for Soviet markets and materials. Starting from a different and much lower base line than the United States, Soviet gains have been notable. Soviet diplomacy has not been encumbered by the vexing questions of trade and defense which form the substance of American/West European relations. At this period of American retrenchment, Washington's continuity of interest in West Europe is widely questioned. Moscow's is not.

* * *

President Nixon has made important parallel efforts to expand the American presence in East Europe. It is not his fault that he has not achieved the same results. Moscow simply does not allow the countries of East Europe the kinds of national choices that the countries of West Europe expect and assert as a right. Soviet power and the Kremlin's readiness to use it—ask the Czechs—assure that Mr. Brezhnev is spared the difficult task of having to consult seriously with his East European allies in order to conduct his relations with them. It remains the case, for all the East-West progress which the Brezhnev visit to Bonn marks, that "Europe" still means primarily West Europe. It is the far-reaching and responsible purpose of Mr. Nixon's policy to make "Europe" eventually mean East Europe too.

THE WASHINGTON POST.

Priorities for Africans

If the 41-nation Organization of African Unity takes its own charter seriously at its 10th-anniversary summit meeting in Addis Ababa this week, it will give priority to two tasks above all others: relieving the famine that threatens millions of Africans in six countries bordering the Sahara, and halting the killing of Africans by other Africans for ethnic and tribal reasons.

It is a measure of the OAU's obsession with ending white minority rule in southern Africa—to the exclusion of everything else—that the organization has played no major role in calling world attention to the catastrophic situation developing as the result of perhaps the century's worst famine in Central and West Africa. This was during the same attitude of neglect assumed by the OAU during a cholera epidemic that the World Health Organization says killed more than 13,000 Africans over the last two years.

The white rulers of South Africa, Rhodesia, Angola and Mozambique deserve the world's censure for repressing African majorities; but none of them has carried out ethnic massacres on anything approaching the scale of the Tutsis and Hutus of Rwanda and Burundi. An estimated 100,000 Hutus were slaughtered by the Tutsi minority regime in Burundi in tribal conflict last year.

The creation of the OAU in 1963, mostly by newly independent countries, was almost a miracle. It is not the first international organization to fall short of lofty goals enshrined in a charter. Yet the leaders assembling in Ethiopia surely realize that their effectiveness is measured not by bellicose resolutions in the UN General Assembly but by progress in building that "larger unity, transcending ethnic and national differences," to which they committed themselves 10 years ago.

THE NEW YORK TIMES.

International Opinion

French Nuclear Tests

France has already shown enough sensitivity to protest to make it worthwhile. Last year's series of tests were reduced from seven to five in response to it. When underground tests begin they will be another concession from the early arrogance and to the dangers of atmospheric pollution. A better long-term answer would be greater exchange of Anglo-American nuclear secrets with France. This is doubtless on the Paris agenda. But it is emphatically not enough.

—From the Sunday Times (London).

A Forgotten Tragedy

This month renewed fighting has broken out between the Tutsi and Hutu tribes in the Central African nation of Burundi. In the spring of last year similar clashes cost the lives of many thousands of people in that country. This time there is also the possibility of an internationalization of the conflict, with neighboring Tanzania and Ruanda sympathizing with the rebellious Hutu majority, while Uganda and Libya have offered arms aid to the Tutsi-run government of Col. Micombero.

It is astounding that a tragedy of this magnitude is being virtually ignored by the outside world, while such intensive attention is being paid—and rightly so—to the social and political problems in "white" southern Africa. Apparently some people supposedly concerned with greater justice in the Third World prefer to keep silent when the issue concerns a black minority government, such as that of the Tutsis in Burundi—even if that government is responsible for the planned murder of tens of thousands of people and the destruction of years of development work.

—From Neue Zuercher Zeitung (Zurich).

Russia and the West

The political implications for people in Eastern Europe of [al commercial opening up are harder to foretell than are the trading prospects. It would be nice to think that it will augment not only the supply of goods, but will be accompanied by greater forbearance—liberty being too much to hope for—of individuals. The hope is a distant one at best. For the moment, indeed, there are no signs of any advance.

—From the Financial Times (London).

The American Presidency

Whether Mr. Nixon stays or goes are matters for the American people. All that foreign governments can do is to try and ensure that constructive world policies initiated by the Nixon-Kissinger team are not altogether lost during this process. However, it is a harsh fact that there is no alternative for America—because of size and power—either in developing cooperative policies with Russia and China or in attempting a new deal for the Middle East, for instance. If the next three years see America paralyzed, we cannot expect to see big advances made in these vital areas of world relationships.

—From the Observer (London).

In the International Edition

Seventy-Five Years Ago

May 23, 1898

PARIS—No one can doubt that the French business world is deplorably misrepresented in many of the French anti-American journals. It is even tolerably certain that the sentiment of sympathy with Spain and thinly disguised hostility to the United States which has characterized the attitude of part of the French press, is by no means shared by the French nation at large, or even by a majority of it. The historical, cultural and commercial links that bind France and America are too strong to break.

Fifty Years Ago

May 23, 1923

NEW YORK—Col. Jacob Ruppert, half owner of the New York Yankees, has purchased the other half interest from Col. Tillinghast L. Huston for the price of $1,500,000, and intends to remain sole owner of the club and its two main assets, Babe Ruth and the new Yankee Stadium. Only a few years ago, the two purchased the club for $400,000, and since have won two pennants and built a new stadium, plus doubling their investment. It was Prohibition that drove Ruppert from brewery to baseball.

'What Next?'

Foreigners Feel Besieged in Libya

By Jim Hoagland

TRIPOLI—Foreign diplomats and businessmen feel increasingly isolated and besieged in this cheerless North African port as Col. Moamer Qadhafi's cultural revolution begins to close in on them and as Libya escalates its passport war against the non-Arabic-speaking world.

Whiskey-drinkers and churchgoers are among those affected by the latest restrictions on social and religious activities of foreigners here.

Most importantly, since the first of the year, diplomats from a dozen countries that have refused to agree to Qadhafi's determined bid to elevate Arabic to the status of an official diplomatic language have been refused entry when they attempted to return to Libya from vacation or business trips.

"We are being held hostage here," the wife of a Western diplomat said dramatically. "We can't leave the country because we never know if they will let us back in."

Morale Plummets

Morale has plummeted for many of the 2,800 Americans and 3,000 Britons who live here. Most of them work in the petroleum industry, which has made this sparsely populated desert country one of the richest in the world in per capita terms.

American oilmen have been ordered to stop importing English-language films for showing at their work camps, and they have had copies of Playboy confiscated in their offices as pornographic literature since Qadhafi vowed last month to end "decadent" foreign influence here.

Diplomats, who were originally exempted from Qadhafi's ban on alcohol, have had their liquor allowances canceled. They now face a long, dry summer with the rest of the country.

The shores of Tripoli, famed in the Marine Battle Hymn, are off limits now to American and other diplomats. In addition to the beaches, private golf and social clubs have also been put out of bounds.

Ironically, Tripoli has become one of the few world capitals where there are no Marines. The last Marine guard at the American Embassy left some months ago, after Qadhafi ordered the American, Soviet and British embassy staffs cut down to 15 members each.

A relaxed Mediterranean port until Qadhafi and other junior army officers seized power four years ago, Tripoli is rapidly shedding the colonial imprint of the Italians as Qadhafi steps up his campaign to bring Libya back to its Arab and Moslem roots.

Qadhafi immediately closed all the bars and brothels in the city, which has 300,000 residents, and forbade that any language except Arabic be used for street and building signs.

The crescent of Islam now perches on the spires of what was the Italian cathedral in the center of town. Qadhafi converted the building into the Gamal Abdel Nasser Mosque.

Small cafés still offer cups of pungent espresso coffee on the piazza across from the Nasser Mosque. They are often nearly empty, as are the green parks of Italian design near the waterfront.

Qadhafi, who comes from a desert Bedouin family, has repeatedly assured visitors that his government would not discriminate against other religions despite his zealous commitment to Islam.

But on Jan. 27, Libyan police took control of the interdenominational Protestant Union Church of Tripoli, which is supported by 100 American and British families and which has carefully steered clear of any missionary work here.

Letters of protest from the National Council of Churches in the United States and Americans here have failed to elicit from the government an explanation for the seizure of the church and its adjacent Sunday school, which was closed down by police last October.

Passport Battle

The passport battle, which began on Jan. 1 when Libya announced that it would grant visas only to travelers whose passports carried an Arabic translation of their identification data, appears to be escalating from a minor harassment for foreigners into a serious diplomatic confrontation.

Most countries have refused to provide Arabic translations for fear of setting a precedent that could create chaos if other countries followed Qadhafi's lead.

Malta, Chad and Niger have rubber-stamped Arabic translations into the passports of their nationals coming here, but Libya has reportedly made it clear that they would accept this only as a transition arrangement until new series of passports are printed in those countries.

Diplomats assumed at first that they would be included in the five categories of exemptions that Libyans have set for oilmen, business people and others the Libyans want to come here.

The new tough approach on passports suddenly surfaced on April 28, when scores of travelers were turned away. Among them was John R. Countryman, economic officer at the American Embassy, who had been visiting Tunisia.

Two more attempts by Countryman to enter the country on his diplomatic passport failed, and another American diplomat who protested his exclusion was swiftly booted out of the country as well, cutting the embassy staff down to five.

The exclusions have cut across ideological lines. Polish and Yugoslav envoys have been refused entry along with British and Dutch diplomats. The No. 2 diplomat in the West German Embassy and his wife were refused entry last week. Some families have been split temporarily, with vacationing parents separated from children.

Qadhafi would score a symbolic but impressive victory in the Arab world and Libyan opinion if he can make other countries formally acknowledge the importance of Arabic.

The United States has reportedly held up visas this year for 450 Libyans, including at least one diplomat, in an effort to pressure Qadhafi into changing his policy. So far, however, neither side shows signs of yielding.

The Work Goes On—Without Any Scanda

By David S. Broder

WASHINGTON.—Reading the papers and watching television these days, it's easy to get the impression that everyone in Washington has stopped work and is just gawking, open-mouthed, at the continuing spectacle of Watergate.

Not so. The government is hard at work as usual, and the easiest way to assure yourself of that fact is to glance at Washington's premier publication, The Congressional Record, and note the industry displayed therein.

Taking a brief respite from the scandals, I dug into my own pile of unread Records, neglected in the rush of recent events, and pulled out the edition of May 7.

6 Bills Passed

It was a fortuitous choice, for on that day, the House and Senate had passed no fewer than six bills touching on a variety of national concerns, from the future of public broadcasting (renewed) to the federal supervision of the Klamath Indians (terminated).

One particular action of the House that day, the passage of the National Cemeteries Act of 1973, struck me as the sort of news which would be heartening to the public.

The bill, as explained by its manager, the Hon. William Jennings Bryan Dorn of South Carolina, whose very name breathes reassurance, has nine major provisions. The most important of these transfers responsibility for the administration of all but a few national cemeteries from the Department of Army to the Veterans Administration and directs the VA to develop promptly a plan for expanding the present inadequate cemetery facilities to meet future needs.

The measure also provides higher burial expenses for veterans and authorizes the burial of an unknown soldier of the Vietnam war in Arlington Cemetery.

The Great Struggle

Despite these seemingly unexceptional purposes, I was surprised to learn the bill had become involved in the great struggle for domestic policy supremacy between the President and Congress. Virtually identical legislation had cleared Congress last October, but had been pocket-vetoed by Mr. Nixon on the grounds that the provision requiring prior congressional approval before the VA could sell off any holdings larger than 100 acres "would undermine the executive branch's government-wide system of property management and surplus property disposal."

That Mr. Nixon had perceived such a threat and reacted to it in such a vigorous fashion was certainly proof that his mind was strictly on government business last fall. Any fair-minded person would understand that with such weighty issues on his desk, the President could not be bothered with details of his re-election campaign or the activities that have now caused more than a dozen of his a resign.

Nonetheless, Congress w parently ready to challen President on the issue, Dorn said that "as or introduced," the new bil identical with the bill vet the President." But aft days of hearings in Ap committee decided to without prejudice" the p to which Mr. Nixon had o

On this issue, clearly, gate has not—as so often —weakened the President in dealing with Congress.

Critics of executive might say the Congre yielded abjectly, but I p take heart from the s fiscal responsibility that G in the person of Mr. Do played in its approach measure. Without saying how he knew, he told leagues that the number als to be subsidized measure is projected to r 284,000 in fiscal 1974 to in fiscal 1978, with the ad annual cost to the gov reaching $51 million.

Debate on the measure vigorous but even-tempe only one member, Rep. E. Wiggins of California, a veteran of two wars, that "this legislation tre erans and their familie favored class." The modern electronic voting —another sign of prog Washington—tallied 340, only Mr. Wiggins's nay. it a very good turnout fo day, a day on which th allege that many House play hooky.

'Quiet Thank Y

In the course of the Rep. Garry E. Brown of gan delivered a "quiet you" to a former constitu Ira Dodrill, who "worke ingly" for expansion of tional cemetery system a "although of advanced a disabled veteran himsel the long journey from Creek to sit in the gall observe the approval of last year.

Regrettably, Mr. Dodr last December, knowing o the measure had been vet the fight would have to b again.

The fight was made the distractions of other ington events—and the H pass the National Cemete of 1973, which Mr. Dorn ed in language of singular as "a reasonable and f looking approach to w hope will be an ultimat factory solution."

The papers and televis course, carried nothing event the next day, being cupied as usual with and calamities. But you reassured to know that in parts of the capital—in gress, the courts and the tive agencies—many such but significant forward st being taken every day.

The Shadow and the Substance

By C. L. Sulzberger

PARIS.—Henry Kissinger's latest Paris visit for the old familiar reason of still more Vietnam talks had an interesting by-product. He discovered that although Europeans were far less alarmist than the vast majority of Americans about the international implications of Watergate, Europe nevertheless really didn't think too much of his Easter Monday speech urging a "new Atlantic Charter."

Since Kissinger has been geographically limited to France on this journey, naturally these impressions were conveyed to him in French political accents. But French diplomacy, it may be assumed, has been actively sounding out the views of its Common Market partners on these subjects.

Although in terms of current events Watergate, of course, is the obsessive interest of the United States nowadays, in terms of history, developing Western relationships may transcend it in importance. Certainly, with the exception of so-called Paris intellectuals and a limited segment of the media, the flaming American political scandal has stirred relatively restrained interest here and no alarm.

The French View

The government view in this capital is that Watergate hasn't had the slightest effect on U.S.-French relationships. Preparations continue calmly for the Nixon-Pompidou meeting in Iceland next week. France feels that the American government is continuing to function as usual and to deal with enormous questions.

For France, this alone is what counts. Moreover, although it plays no part in the assessment, there is a certain sympathy for President Nixon in ruling circles. He has always been regarded as pro-French and pro-Gaullist with excellent personal ties to President Pompidou.

This being said, it is evident that Frantz and here it feels that similar views are shared elsewhere in Western Europe—was unhappy with both the method and the message of the Kissinger speech last month. This attitude has in no sense been kept from Kissinger himself.

There is no conjecturing here (as in some American quarters) that the speech was linked to Watergate as an attempt to divert public attention from that growing scandal. But there is a feeling that it was produced in a surprisingly maladroit way.

No Advance Talks

There had been no advance consultation between Washington and its allies, nor even the faintest advance intimation that an important message of particular concern to Europe was forthcoming. Consequently, this inspired a suspicion that the ideas outlined by Kissinger had been prepared, put on paper, and carried about for weeks before being suddenly sprung upon the world. This was and is resented, much as Kissinger is admired on this side of the ocean.

Many Europeans were thus startled by the abruptness, if not brutality, of approach. And, beyond this, there is a widespread sentiment that the timing of the actual message was as awkward as the means of conveying it. West Europe feels there is no point in now starting a grand new negotiation which must ultimately affect the political shape of things to come and which involves questions of defense, trade and monetary policy.

From the European viewpoint, as it has apparently been explained to Mr. Kissinger in courteous but direct terms, it is useless to embark on any of these subjects until a settlement—or at least a temporary solution—is first agreed upon for the continuing crisis. After all, it is argu everyone knows what currencies are really wor impossible even to calcul for military arrangements mercial exchanges.

There isn't the slightes that this will be stressed sieur Pompidou at H From a European standp the primordial point fa countries with free curr is therefore the cardinal every contemporary sum cept those involving whose ruble is seen as sub to arbitrary and artific trols.

Recurrent To

Willy Brandt discussed ter at length with Mr Prime Minister Heath been discussing it at le President Pompidou. And ter has every intention discussing it at length American peer.

To sum up, the curio of the wholly unexpecte which is steadily und Nixon's position in th States is that it has ha ous repercussion on rela tween the United St European governments; current events that were to inaugurate Mr. Nixon pean Year." What has h more serious effect, to d steady decline in the economic and monetary to which this region is tied.

Letters

Plundered Art

Norton Simon's "collecting" is as repugnant as it is anachronistic. At a moment when the much publicized Indian temple sculpture comes from a country where the specter of famine looms large it seems incredible that the gangsters of the art market should flaunt their opportunism and arrogance.

The United States must refuse to admit objects of art whose provenance is not absolutely clear. The present laws are inadequate and outdated. The United States is one of the major terminals of plunder and the U.S. Customs should cooperate with authorities in the plundered countries to inhibit this traffic.

In the long run it might be argued that works of art belong to all humanity; at the moment it horrifies me to think that someone like Norton Simon can decide who may and may not see these works.

Bonn Draft Objectors Given Wider Options

BONN, May 22 (Reuters).—The West German parliament has passed a law enabling conscientious objectors to military service to be employed in a variety of civilian occupations instead.

In the future they may be compelled to work for local authorities for 15 months—the period that other young men serve in the armed forces. Hitherto, the conscientious objectors' "substitute service" has been limited to work in hospitals and mental homes.

By next year, alternative employment will be provided for about 20,000 men, compared with 12,000 now, a government spokesman said. The number of conscientious objectors reached a peak of 33,792 last year, but last month was 3,045—a 5 percent drop compared with April of 1972, he said.

Yemenite Cleared In Milan Bombing

MILAN, May 23 (AP).—A Yemenite taken into custody last weekend in connection with a bomb explosion in front of the Milan police headquarters has been cleared of any link with the crime.

Guido Viola, the magistrate investigating the bombing, said today that Al Ehdal Mohammed Mansourt, 37, identified earlier by AP as Mohammed Mansor Saud, 35, had no connection with the case. However, he will be kept in jail on charges of swindling and possession of a counterfeit passport, the magistrate said.

Gianfranco Bertoli, 40, an Italian anarchist just returned to Italy from Israel, was charged with the bombing in which a woman was killed and 40 other persons injured.

Associated Press.

LIGHTS OUT—The federally owned Lake Erie lighthouse at Lorain, Ohio, built in 1914 and operated by the Coast Guard, has been declared surplus by the Government Service Administration and is up for sale. It sits on a breakwall in the Lorain harbor, perhaps the ideal place from which to watch the sunsets.

Obituaries

Band Leader Vaughn Monroe Of 'Racing With the Moon'

STUART, Fla., May 22 (AP).—Vaughn Monroe, 62, the band leader and smooth baritone who rose to prominence in the 1940s with the theme song "Racing With the Moon," died here yesterday.

His wife, Marian, said he became ill and underwent stomach surgery two weeks ago after returning from an engagement in Louisville, Ky., at the time of the Kentucky Derby. He died in the hospital.

Born in Akron, Ohio, Mr. Monroe was playing and singing with bands in western Pennsylvania at the age of 15. He formed his own band in 1937, and for eight years the group was featured on the popular radio program "Camel Caravan." The band stayed together until 1953.

Mr. Monroe was one of the first major entertainers to do television commercials and for 15 years was known as "The Voice of RCA."

His hit recordings included "Ghost Riders in the Sky," "There I've Said It Again" and "Ballerina."

"We made no concessions to rock 'n' roll," Mr. Monroe said in a recent interview. "It is foreign to me. I would be out of place if I ever tried it. The record industry today is such that they put records out like popcorn. The young performers make one record and they are hot. They have never been through the one-night-stand business—playing in barns, freezing to death in unheated ballrooms."

A private funeral was scheduled with burial in Stuart, where Mr. Monroe had lived for the past seven years.

Vaughn Monroe

Carlo Emilio Gadda

ROME, May 22 (UPI).—Novelist Carlo Emilio Gadda, 79, a brilliant experimenter with the Italian language and considered one of the country's greatest contemporary writers, died here yesterday after years of illness.

Mr. Gadda had been suffering from arteriosclerosis for 15 years before pneumonia took his life.

Mr. Gadda was a Milanese, who turned to writing after practicing engineering in Argentina, Germany and France. He was described by a critic as a "language engineer."

Mr. Gadda's best known work, "Quel Pasticcio Brutto de Via Merulana" (That Ugly Mess on the Via Merulana), is a crime novel which depicted life in Rome in early Fascist times. He won the 1963 International Literature Prize for his novel "The Knowledge of Pain."

Donald Perkins

NEW YORK, May 22 (NYT).—Donald Perkins, 61, who retired in 1971 as executive vice-president for sales of Cowles Communications, died yesterday in New York Hospital. He had the post for seven years.

Edwin C. Vogel

NEW YORK, May 22 (NYT).—Edwin C. Vogel, 89, a former senior officer of CIT Financial Corp., a leader in several philanthropic organizations and a well-known art collector, died here yesterday.

As an art collector, Mr. Vogel specialized in the French Impressionists and post-Impressionists, English furniture and Chinese porcelain of the Kang Hsi period. He gave the porcelain to the Metropolitan Museum of Art.

Italy Increases Lead in Bridge

GUARUJA, Brazil, May 22 (UPI).—Italy lengthened its lead over the Aces of Dallas in the race for first place honors in the 19th annual Bermuda Bowl international bridge championship yesterday, with a decisive triumph over the Indonesian team.

Brazil, third in the five-team tournament, moved closer to contention by drubbing the United States team.

Midway through the second day of the third round, the standings were: Italy, 166 victory points; Aces, 139; Brazil, 118; United States, 94, and Indonesia, 78.

In the matches yesterday, Italy defeated Indonesia, 18-4. Brazil beat the United States, 20 to minus five.

Two U.S. teams are competing in the tournament because the Aces as defending champions were excused from the elimination matches that decided the four other contenders for the Bermuda Bowl title.

5 Years for Man In Wanton Stabbing

LIVERPOOL, May 22 (UPI).—Laborer Alan Hutton, 18, went to jail yesterday for five years for stabbing a stranger six times in the back.

The police told Liverpool Magistrates Court that when arrested Hutton said: "I had just seen the film 'Clockwork Orange.' I thought I'd kill someone and this man was the first I saw."

Australia Says French Tests Pose Unpredictable Hazards

THE HAGUE, May 22 (AP).—Australia told the International Court of Justice today that fallout from French nuclear tests in the Pacific will pose health and environmental hazards for the Australian people that are impossible to forecast.

"There is a real risk that serious harm could be suffered by Australia and its population as a result of further tests," declared the Australian solicitor general, Robert J. Ellicott. He said "the hazard . . . is impossible to foretell . . . because of the inherent uncertainties as to the precise effect of radiation" and because of French secrecy.

Mr. Ellicott, in the second day of Australian pleading for a World Court injunction against the A-tests, said it was "unthinkable" that France should refuse to attend the proceedings. He said that few orders of the court "will be more closely scrutinized" around the world than its ruling on the legality of nuclear testing in the atmosphere.

Australia and New Zealand are asking the court to rule that France's nuclear series on the deserted Mururoa atoll will violate international law and the Charter of the United Nations.

Fiji has been given permission to join the case with what are expected to be its objections against the tests, court informants said.

During today's hearing, which lasted more than four hours, Mr. Ellicott said that previous French tests had caused fallout over Australian territory and subjected its people to the effects of radiation. He said this infringed on Australia's sovereignty.

He asserted that previous fallout on Australia had been "conceded" by French scientists recently.

Declaring that "France has refused to give any information as to the nature and yield of the devices which it proposes to explode," Mr. Ellicott said that the court could assume that the fallout and radiation "could be greater than that resulting from previous tests."

Underground Plan Reported

PARIS, May 22 (AP).—France is investigating the possibilities of developing an underground test site, diplomatic authorities reported today.

One area that has been checked lies within the Marquesas, a Polynesian archipelago owned by France and lying about 1,000 miles northeast of Tahiti, the sources said.

But the French have said that the planned atmospheric tests will go on, and have implied that the nuclear devices will be small and "clean."

Bonn Honors American

BONN, May 22 (IHT).—Navy Capt. Pickett Lumpkin, director of public affairs for the U.S. European Command, today received the Grand Cross of Merit of the Federal Republic for his work in promoting German-American relations.

Bavaria Suit Seeks to Block E. German Tie

BONN, May 22 (UPI).—The Bavarian state government said today it will bring suit in an attempt to have Chancellor Willy Brandt's good neighbor treaty with Communist-ruled East Germany declared unconstitutional.

The directly-elected lower house of the federal parliament approved the treaty 10 days ago, but it has yet to pass the upper house which comprises representatives of the state governments.

The upper house is scheduled to vote on the treaty Friday.

Ruediger von Wechmar, government spokesman, said the government "is convinced the treaty reflects the constitution."

The Bavarian government, controlled by Christian Democrats who are in opposition on the federal level, contends the treaty with East Germany violates the constitutional injunction "to achieve in free self-determination the unity and freedom of Germany." The Bavarians said that the treaty actually seals the division of Germany.

Soviet Writer's Term Extended

MOSCOW, May 22 (AP).—Dissident writer Andrei Amalrik, who was expected to be freed yesterday after three years in a Soviet labor camp, is being held in a Siberian prison in connection with another criminal case, his wife disclosed today.

Mrs. Amalrik said that a duty officer at Magadan prison in eastern Siberia told her by telephone that her husband's "term has been prolonged for questioning in connection with another case."

The official did not elaborate, she said.

Mr. Amalrik is best known for "Will the Soviet Union Survive Until 1984?", a biting criticism of party policies, and "Involuntary Journey to Siberia." The two books and a filmed interview with an American newsman, William Cole of CBS, who was expelled, were the primary evidence against him at his 1970 trial. He has not been published in Russia.

Israeli Jet Crashes

TEL AVIV, May 22 (AP).—An Israeli Air Force jet crashed into an empty synagogue in the town of Tivon yesterday after the pilot bailed out safely. No residents of the town were injured. The Israeli military command would not disclose the reasons for the jet's failure.

Controversial British Aide Quits Suddenly

LONDON, May 22 (Reuters).—Lord Lambton, who disclaimed his father's title of the Earl of Durham in 1970 and then was denied and later allowed to keep his honorary title in the House of Commons, resigned his government post in a surprise move today.

A terse statement from the prime minister's office said Lord Lambton was resigning his post—as parliamentary under secretary for defense for the Royal Air Force—because of "personal and health reasons."

Lord Lambton, 50, said later that his political career is now definitely over.

Political observers called the manner of his resignation—a two-sentence statement made with the prime minister absent in France—an unprecedented one.

All the money you'd spend to rent somebody else's car in Europe could go toward owning your own Fiat in Europe

When you stop to consider how much money it costs to rent a car for two or three weeks, it really makes a lot of sense to put that money into owning a Fiat. Drive it around and when your vacation is over you'll have something worthwhile to take home with you instead of just a rental receipt.

CANNES FESTIVAL

This Year's Scandal

By Thomas Quinn Curtiss

CANNES, May 22 (IHT).—Every festival must have its scandal. The Cannes Festival has rarely failed to comply to this unwritten rule. There was the case of the celebrated director who grew so angry when the first prize went to someone else that a special award was invented to soothe him. There was the case of the juror who had to resign when it was discovered that his company was negotiating to buy a film under judgment. This year's scandal has come late. It is the indignation over the French entry, "La Grande Bouffe," shown at the Palais du Festival last night.

After the screening, the Hotel Carlton bar—where prominent festival guests gather to discuss the evening's event—was electric with indignation. "It's stupid." "It's loathsome." "It's nothing." "I had to leave." "I thought I would vomit." "How dare that unwashed fat man . . ." (The last a reference to the movie's director, the Italian Marco Ferreri.) These were some of the comments. At the risk of being excluded from polite society, I do not agree with these opinions. "La Grande Bouffe," deliberately and violently bad mannered, seems to me to be one of the festival's most interesting entries, a bold, black comedy of defeat, decay and death that is a vastly entertaining extravaganza despite its excesses.

Four men in their middle years—an airplane pilot, a restaurateur, a radio announcer and a judge—are united in friendship by their compulsive gluttony. Each is convinced that life is not worth the candle and they agree to commit suicide together, eating themselves to death at a gigantic feast held in the disused mansion of the judge. They decide to indulge their sexual proclivities as well—though their dominating vice has rendered them virtually impotent—and invite two call-girls to join them and extend a welcome to an obliging schoolmistress who happens into the garden.

This orgy, continuing for two hours, is the subject of the film and Ferreri depicts it with a ruthless realism, verging on the clinical.

Ferreri's ferocious farce is utterly unrestrained in its Rabelaisianism. It exaggerates its exaggerations. It pounds its points and revels in a low-comedy cynicism, adding quite gratuitously a sewer explosion. It is not for the squeamish, but should this be held against it in any critical evaluation? It is in bad taste. "La Grande Bouffe" is over-ripe, over-spiced and over-long but it has compensating features for these faults. It has individual character and style, and an intriguing exoticism. Perhaps "Buñuelesque" is the adjective for it. It is admirably acted by Marcello Mastroianni as the ex-Don Juan airman, by Michel Piccoli as the windy announcer, by Ugo Tognazzi as the kitchen maestro and by Philippe Noiret as the complacent host. This quartet of desperate gluttons will remain in memory. Beneath their unrefined buffoonery there are strong satirical undertones of an infinite sadness.

* * *

Geraldine Chaplin shows marked improvement as an actress in the Spanish film, "Anne and the Wolves," in which with gentle poignancy she portrays an innocent English governess in a country household. The male members of this family are all mad in varying degrees and are to her "as the wolf to the lamb," bringing about her destruction. Carlos Saura, the author-director, attempts the Buñuelesque, both in his writing and in his mise en scène. One feels that he should have concentrated on a single function for neither his scenario nor his staging is very satisfactory.

* * *

"L'Invitation" arrived from Switzerland as a happy surprise. It is a distinguished motion picture. A retired clerk bids his former colleagues to his new home after he has come into a small fortune. His generosity is rewarded by the rebirth of old spites as the refreshments flow at his garden party. This slice-of-life drama, perfectly acted under the guidance of Claude Goretta's direction, is striking in its ability to hold one's attention firmly and in the fine clarity of its character delineation.

* * *

Though it seems extremely unlikely that anyone this side of a lunatic asylum would today seek to defend Hitler, an English film about his last days was recently banned from a chain of London cinemas on such a charge. Yesterday there were curious reactions to the showing of "Swastika" here. This is a documentary, cut from available footage, covering Hitler's career from his coming to power until the outbreak of the war. It, too, is a British product, and was projected with French subtitles on the out-of-competition program.

It includes—in addition to newsreels of Nazi rallies, party ceremonies and life in Germany from 1933 to 1939—home movies made by Eva Braun and her friends at Hitler's Alpine mountain retreat. These sequences have been poorly dubbed into German, though they were silent. It was felt that voice-over comments about the Nazi and the use of Noel Co ditty, "Don't Let's Be Bea the Germans" was inappr as a finale for this grim "Swastika" is certainly an but it would benefit from expert editing.

Director Marco Ferreri (gesturing) meets the critics after his film "La Grande Bouffe" was shown at Cannes.

When Elegance Was in Fashion

By Hebe Dorsey

PARIS, May 22 (IHT).—"Elegance," a best-seller published barely nine years ago, is a sober reminder that fashion dies fast.

It was written by Geneviève Antoine Dariaux, a former *vendeuse* at Nina Ricci's and now a fashion consultant in the United States. "Elegance" (that very word, is enough to make most people cringe today) is now as obsolete and as entertaining as a 19th-century book of etiquette.

From A to Z, it unravels all kinds of fashion problems, with extensive studies of hats, gloves, the little black dress and pearls "appropriate for almost every occasion and indispensable in every woman's wardrobe."

Of gloves, Mrs. Dariaux writes: "Even women who never wear a hat should always wear gloves . . . You should train your daughter to wear gloves as soon as she is old enough to walk. Nothing is more charming in the summer than to see a mother and daughter with bare arms and the same little white cotton gloves."

The "ideal glove wardrobe" includes (take a deep breath): "Several pairs of kid gloves, white, black, pale beige, rosy beige and toast. A pair of pigskin and calfskin gloves for driving and sports and several pairs of washable white gloves for summer."

Not Complicated

Mrs. Dariaux adds reassuringly: "Glove etiquette is not at all as complicated as many women believe . . . They should always be removed when eating, even if it is no more than a cocktail canapé. But a lady never takes off her gloves in order to shake hands."

Finally, a good trick for selecting gloves is "to slip a different one on each hand and then to study each profile in the mirror: The best looking-side wins."

Mrs. Dariaux is also all for hats. On page 117, she comes out with "a strong suspicion that the most generous men become terribly stingy where their wives' hat bills are concerned, and that men have made fun of women's hats during all those years just so they wouldn't have to pay for any." Yet, "Whether she is entertained in a restaurant or at the home of friends, a woman luncheon guest should always wear a hat," for a new hat "becomes a sort of moral armor, fortifies a woman's self-confidence and does more for her morale than a bucketful of tranquillizers."

Later the author admits wistfully: "It is not very convenient to wear a hat to the theater, unless it is a very small one."

Bags, somehow, are not important. But Mrs. Dariaux says: "As for myself, I infinitely regret the passing of the old-fashioned muff."

As for earrings, Mrs. Dariaux says that they do not go well with eyeglasses, and warns against wearing them with jewel-trimmed glasses. But, "if you cannot bear to leave your diamond earrings at home, why not try using a lorgnette?"

Black Dress

Sternly warning that "even when you go to one of the small, avant-garde theaters, you should still . . . wear a simple black dress with white gloves, which will immediately give you a festive air," she adds: "Feeling more beautiful, you are apt to find the play better. And even if it is really very bad, at least the intermission will be diverting because you can always admire yourself in the mirrors of the theater lobby."

Veils, she laments, "are somewhat out of fashion at the moment (and I cannot imagine why) . . . they add a lovely air of mystery and distinction to the most ordinary features, so that even the most humdrum housewife gives the impression of being on her way to some romantic rendezvous."

All through the book, the absence of color is striking. In her basic minimum wardrobe, Mrs. Dariaux lists black and brown clothes (with the exception of a red coat) and for summer nothing but beige, white, navy and gold.

The taboos make you realize how much fashion has changed. "A diamond ring is the only form of diamond jewelry that can be correctly worn before lunchtime;" "slacks are absolutely unaesthetic and vulgar to wear on a city street, even in a raging snowstorm;" "wearing a print dress under a fur coat is a cardinal sin;" "wedge heels and ankle straps are both unflattering and cheap looking;" "a good suit is the foundation of a woman's wardrobe;" and "only solid colored sweaters of cashmere or silk are elegant in the city."

Another ill-fated statement: "Without the haute couture, we would probably end up by being dressed in functional uniforms in the style of Red China."

The book ends with zoology, which brings us to dogs, and there, too, Mrs. Dariaux has some priceless advice. "Whatever his breed," she writes, "your dog deserves to be as well groomed as his mistress," quickly adding: "but please, if you really love your dog, don't buy him a mink."

OPERA IN VENICE: A Minor Bellini—A Major Mistake

By William Weaver

VENICE (IHT).—Last week the Teatro San Carlo in Naples presented a memorable edition of Bellini's masterpiece "Norma" (IHT, May 19-20). Everything seemed then to concur in creating a warm and exciting evening. At the same time, the Teatro La Fenice in Venice was showing off a new production of another Bellini work, "I Capuleti e i Montecchi," not perhaps a masterpiece, but written less than two years before "Norma" and a year before "La Sonnambula," and hence a work of supreme interest, both historical and musicological.

Great composers' masterpieces tend to be left alone, while their lesser works, unfortunately, seem to be the predestined victims of well-wishers whose aim is to run up new "hits" based on these minor compositions. And so the popular young Italian composer Claudio Abbado some years ago turned out a "revision" of Bellini's Romeo and Juliet story. And, it might as well be said at once, Abbado's Bellini is counterproductive, a useless, anti-historical, and indeed anti-musical exercise, which has done a great Italian composer a bad turn and has failed to achieve its aim: to render more homogeneous an uneven opera.

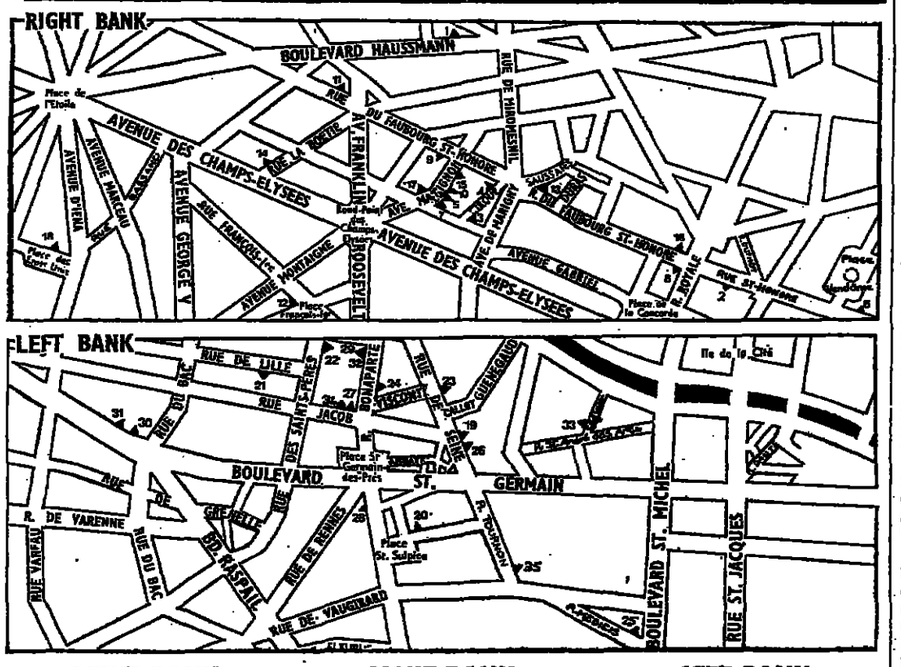

Bellini wrote his Capulets and Montagues for the Fenice in 1830, in about a month, accepting the assignment at least in part because the Romeo was to be the great Giuditta Grisi, his friend and—according to some—his mistress. Now Claudio Abbado has decided that modern audiences cannot bear to see a mezzo-soprano dressed as a man and playing a hero, so he has rewritten Romeo's part for a tenor. This obviously makes a hash of Bellini's carefully-calculated vocal effect, and also creates serious difficulties for the contemporary tenor who has to deal with a bel canto mezzo (or dramatic soprano) role.

As the now-tenor Romeo, Variano Luchetti did his best. He has many virtues as a singer: remarkably clear enunciation, convincing and appealing stage presence, elegant musicianship. But Bellini had something else in mind, and Luchetti appeared at less than his best with a verismo style that was totally out of place (Abbado's fault, not his). His Juliet was Katia Ricciarelli, Italy's most controversial young soprano, launched with tremendous publicity, then accused of going too far too fast, and recently booed at La Scala in—of all innocuous operas—Puccini's "Suor Angelica." The timbre is undeniably sweet and so is Ricciarelli's appearance. But she is still not mistress of the stage. Her first scenes were cold; only gradually did she show some sense of Bellinian recitative—any soprano's greatest test—and finally she became moving in the superb conclusion, perhaps the best pages of the opera.

The other roles were dreadfully sung. Though conductor Piero Bellugi shaped many scenes beautifully (notably in Act II), the orchestra was not at its best, and the chorus, especially in the beginning, was inexcusably ragged. Sando Sequi directed one would guess with his left hand. The sets and costumes, by the admired Italian sculptor Enrico Job, had admirable visual qualities, though the sets—with their shallow, steep stairways—were uncomfortable for the artists and thus nervous-making for the audience.

Bellini's "I Capuleti e I Montecchi" deserves a wider acquaintance (why not a complete recording?). But the Abbado version must be irrevocably scrapped. It is an insult to the audience's intelligence and to Bellini.

...lé Uncloaks Corporate Secrecy

...y Brendan Jones

... May 22 (NYT).—"Multinational ...ust explain themselves more."

...t would sound trite coming from ...tive of a public-relations-conscious ...oration. But when made by the ...ector of Nestlé Alimentana, SA, it ...

...g steeped in all the Swiss traditions ...and business privacy, Nestlé has ...policy of keeping competitors and ...ders guessing what it was going ...

...g to the Nestlé managing director, ...Vogt, the company has been grow...ly less reticent about some of its ...also adding new products such as ...tant coffee and prepared foods.

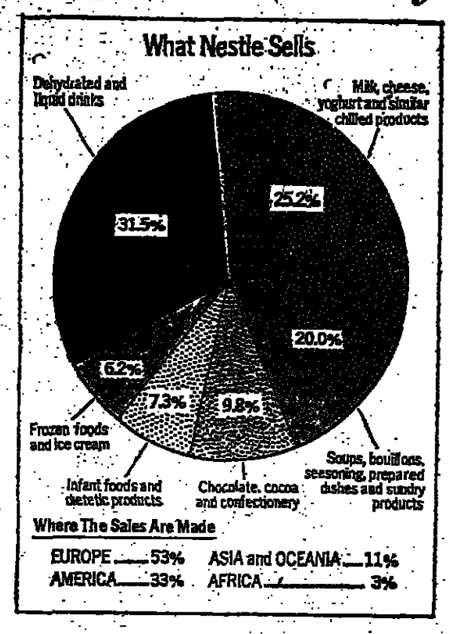

...e of the oldest and largest multi...tablished in Switzerland 106 years ...d there today, it ranks among the ...industrial companies outside the ...and would rank among the top ...de the United States. Mr. Liotard-...in an interview here last week that ...al companies, wherever they may ...t recognize that worldwide changes ...and attitudes are affecting them. ...us, he said, are the antagonisms of ...toward multinationals as being ...

...als," he said, "have gotten a bad ...of things like the International ...Telegraph business in Chile. But ...us the exception and it has been ...hat ITT did also did not work.

...ational company cannot go along ...on growth, new products and mar...lf-knowledge that it is doing nothi...has to take time to tell what it ...does not, there is a tendency now ...wonder what it is doing, to be ...

...is own advice, Mr. Liotard-Vogt ...some of the headaches his com...n experiencing with U.S. anti-trust ...connection with its recent acquisi...country. Among these are a major...ow 56 percent in Libby, McNeil & ...purchase in March of three Stouff...it and food divisions of Litton ...

...n, according to Mr. Liotard-Vogt, ...stioning by the Federal Trade Com...possible overlapping of competitive...rest among the acquisitions and ...rican subsidiary. Nestlé Co. Inc. ...Libby both produce frozen foods, but ...

Mr. Liotard-Vogt said that neither concern holds any significant part of the domestic market.

Mr. Liotard-Vogt said he was not especially upset by the fact that Nestlé must make extensive disclosures of its operations in the FTC investigation. But he said he was discouraged by what he considered the inconsistencies of American policy in having one branch of government—the Treasury Department—encourage foreign investment, while another branch—the FTC—raised obstacles to it.

Three years ago, when Nestlé acquired a controlling interest in Libby after gaining a one-third interest in 1967, Mr. Liotard-Vogt said, the transaction had been cleared by the anti-trust division of the Justice Department.

Despite these problems, the Nestlé official expressed optimism about developing new business in the United States in wines, restaurants and such new products as crepes. Nestlé also recently bought the small California winery of Beringer Brothers and is busy expanding it with new plantings.

But Trading Is Nervous

Price of Gold Retreats $1.50 As Dollar Gains in Strength

By Carl Gewirtz

PARIS, May 22 (IHT).—The price of gold retreated today from the record high of yesterday as the dollar improved on the foreign exchange markets.

However, dealers said trading remained nervous although the volume of business transacted was average.

In early trade, the price of gold held yesterday's closing quote of $112 an ounce. But it slipped as low as $110 in Zurich before settling at $110.50 an ounce late today in both Zurich and London.

The dollar moved in a narrow range, slipping below yesterday's close in many markets in early trade and advancing at midday before settling back to show a slight improvement for the day.

Intervention Warning

In Zurich, the dollar traded between 3.085 and 3.11 francs and closed at 3.105. A Swiss banker warned that the government might be forced to intervene to prop the rate if it should remain "persistently below" 3.10 to protect Swiss exporters from being priced out of world markets.

The view in Frankfurt is that German investors are repatriating their investments, taking advantage of the high domestic interest rates and the continued uncertainties on the international market.

German bankers do not anticipate any move in the immediate future on the part of the Bundesbank to stabilize the dollar's value as the decline—a de facto revaluation for the deutsche mark—is seen fitting in with the government's anti-inflation policy.

The dollar traded at a low of 2.735 DM today, rose to a high of 2.7485 and closed at 2.7450, up from yesterday's 2.741.

Volatile Trade Seen

Bankers in all the major markets observed that trading in both currency and gold can be expected to remain "extremely volatile" until the promised reforms of the international monetary system are achieved. They also warned that the Watergate investigations and the uncertainties cast over President Nixon will continue to feed the nervousness of the markets.

The overall view is that until Washington makes significant progress on controlling an overheated economy without falling into a recession and on improving the balance of payments, the dollar will remain under suspicion and will be subject to very nervous selling.

Sterling Drops

Until now, Britain had been benefiting from all this uncertainty as foreign funds, attracted by high interest rates, were flowing into sterling. But the half-point decline in the base lending rates of the major U.K. banks yesterday and today apparently provoked some second thinking. Sterling closed at $2.5625, down from its high of $2.5750.

U.S. to Report Its Currency Interventions

WASHINGTON, May 22 (NYT).—The Treasury, the Federal Reserve Board and a key congressional subcommittee disclosed agreement yesterday on a new system of more frequent reporting on interventions by the government in the foreign exchange markets.

After a closed-door session with Paul A. Volcker, Under Secretary of the Treasury for Monetary Affairs, and Arthur F. Burns, chairman of the Federal Reserve Board, the subcommittee on international finance of the House Banking Committee made public a letter formalizing the agreement.

The agreement has two elements. First, there will be a confidential letter to the subcommittee every month, giving "aggregate net purchases or sales of foreign currencies during a one-month period ending 30 days prior to the date of the letter."

Second, the Fed will publish quarterly, instead of every six months, details of the government's foreign currency operations. The report, according to the agreement, "will cover operations during a three-month period ending 30 days prior to its release."

The agreement apparently cleared the last obstacle to House passage of the legislation making formal the February devaluation of the dollar by an increase in the official gold price from $38 an ounce to $42.22. The House is expected to take up the bill, which has already passed the Senate, Thursday.

Stocks Rise on Technical Factors

By Terry Robards

NEW YORK, May 22 (NYT).—The stock market rebounded today and posted a moderate advance in active trading after nine consecutive sessions of falling prices on the New York Stock Exchange.

The Dow Jones industrial average closed with a gain of 5.95 at 892.46. The Dow had been up as much as 11.97 after the first half-hour of trading, but then swung erratically for the rest of the session.

Wall Street sentiment was bolstered by a report from the Labor Department that the rate of increase in the consumer price index had slowed in April. Herbert Stein, chairman of the Council of Economic Advisers, said this meant inflation was receding.

Inflation has been one of Wall Street's chief worries, and any indications of success in conquering it tend to be greeted with enthusiasm in the investment community. At the same time, however, today's rally appeared largely technical—a natural reaction to the previous declines.

Volume on the NYSE totaled 18.02 million shares, down from yesterday's heavy 20.69 million but still fairly strong in comparison with the sluggish pace of the last two months.

For the first time since May 8, advancing issues outnumbered declining issues. Advances totaled 858 and declines 648. Only three stocks traded at new highs for the year, while 406 sank to lows.

Eastman Kodak was up 2 3.8 to 128 3/8, Walt Disney 2 to 88 1/2, Polaroid 1 1/2 to 129 1/2, Superior Oil 10 to 227 and Dow Chemical 3 7/8 to 51 3/4.

Colgate-Palmolive rose 7/8 at 90 7 8 and Helena Rubinstein gained 5 5/8 to 30 1/2. Colgate said it has entered negotiations to acquire the cosmetics company.

IBM was 3 1/4 higher at 390. The company announced the introduction of a high-speed documents processor for banks.

Fluor was up 2 5/8 to 40 1/4, Ford 1 to 57 3/8, Philip Morris 2 3/4 to 108 3/4, Texas Instruments 1 5/8 to 189 5.8, and A. H. Robins 2 1/8 to 30 1/2.

Northwest Airlines picked up 1 7/8 to 24. Northwest said it has received a $12.4-million contract from the Air Force for long-range international airlift services.

Grumman was 1 higher at 9 1/4 and McDonnell-Douglas 1 8 at 23 1.2. Marine Corps Commandant General Robert Cushing has agreed to switch $890 million earmarked for the McDonnell-Douglas F4 to the Grumman F14 fighter.

Prices on the American Stock Exchange were slightly lower in moderately active trading. The Amex index was down 0.02 to 22.44, and declines led advances 528 to 403. Volume was 4.18 million shares, compared with 5.1 million yesterday.

Meanwhile government bonds moved narrowly to close mixed on balance, after initial firmness, while corporates lost most of early gains.

FINANCIAL NEWS AND NOTES

U.S. Oil Firms Sign Pact With Egypt

Two major U.S. oil companies have signed agreements with Egypt committing them to spending a total of $73 million on offshore exploration in the Mediterranean north of the Nile Delta. Mobil Oil Corp. will invest $23 million over eight years and Exxon Corp. $50 million over 12 years, according to Ahmed Hilal, the Egyptian petroleum minister. The agreements are the first signed with Egypt by major U.S. companies in 10 years. American Oil Co. and Phillips Petroleum, as well as Italy's ENI, have been drilling there since 1963 with varying success.

Volkswagen Introduces New Model

Volkswagenwerk has introduced its previously announced new car, the "Passat." The basic model, a restyled Audi 80, will cost 8,300 deutsche marks ($3,960) and will be offered in 17 variations, equipped with engines of 1.3 and 1.5 liters. The new car makes use of VW's new "building block" system, where as many parts as possible are interchangeable from one model to the other. The major difference between the Passat and the Audi 80 is a restyled front and back end. In other news from the company, Volkswagen of America Inc. says it is raising prices of its cars an average 2.9 percent. The boost, the third VW price increase in 1973, is necessary because of "the decline in value of the dollar in international currency markets," the company says.

AEG, Sony End Dispute on PAL

AEG-Telefunken says it has reached agreement with Sony on terms for granting a PAL color television license to the Japanese firm. AEG said the agreement, which covers radio and monochrome television patents as well as the PAL license, will come into force as soon as the Japanese authorities have granted the necessary approval. As a result of the agreement, AEG will drop the legal proceedings instituted against Sony in August last year which aimed at restraining the Japanese firm from selling its "Trinitron" color sets in West Germany, the company adds.

Exploration Efforts Are Intensifying

...nesia—A Major Hope for U.S. Oilmen

May 22 (AP-DJ).—...ong with the North ...pe, is a major hope ...d exploration around ...growing in intensity. ...cited," says the top ...U.S. company. "This ...last major remain... the world for seek... ...we know there is oil ...

...nt attitude is more ...tempered and mature than it was three or four years ago, when enthusiasm was also high. Some people then were describing the area as another Middle East.

That enthusiasm was based mainly on the promises of geologists, as little exploration work had been done. A few years of dry holes curbed the high hopes.

Now, however, the problems of this area are better understood, and the attitude is more realistic. The idea of Indonesia's turning into another Kuwait is dismissed. "So far, the reserves in Southeast Asia can't touch the Middle East, but there is tremendous potential here," says Frank J. Murphy, manager of operations for Independent Indonesian American Petroleum Co. "When you look at the area involved, very few wells have been drilled. We've just scratched the surface."

Decades of Drilling

Oilmen say decades of drilling will be needed to fully prove prospects in this region which is the size of the United States. "You know how long we have been drilling in west Texas," remarks the head of one U.S. oil company in Jakarta. "The South China Sea is much bigger than that, and 10 or 12 dry holes up there isn't enough to condemn it."

Despite problems, oilmen remain convinced that a great deal of crude is to be found. Several sources in Jakarta estimate proven reserves at more than 10 billion barrels, and each new strike adds to this figure.

Unlike Mideast petroleum, much of the oil found in Indonesia so far is a "sweet" crude of relatively low sulphur content, much like the crudes of Louisiana. For this reason, Indonesian oil is much in demand and is drawing a premium price in the United States, where low-sulphur crude is in short supply.

Shipped to the West Coast of the United States, Indonesian crude costs $4.63 a barrel, including 90 cents for transportation charges. This compares with about $4 a barrel for the highest-priced U.S. crude.

Current Daily Output

Current output is about 1.2 million barrels daily, and about 970,000 of these barrels come from one company, Caltex, a venture of Texaco and Standard Oil Co. of California.

The total Indonesian production compares with output of 9.3 million barrels a day in the United States, 7.1 million in Saudi Arabia and 2.3 million in Libya.

Pertamina, the state company that directs all oil operations in Indonesia, says national production should reach 1.5 million barrels daily next year.

Indonesia earned more than $900 million last year in oil exports, up 64 percent from 1971. Investment in the industry by both Pertamina and foreign companies since 1966 has exceeded $1 billion.

American Dream of Success Turns Sour for Businessmen

NEW YORK, May 23 (AP).—The American idea of success is being infiltrated by doubt, restlessness and disillusionment, according to a survey by the American Management Associations.

The survey, which drew the greatest response ratio in the business and educational organization's 50-year existence, shows that many businessmen, rather than an isolated few, are reacting against conformity and impositions on health and conscience.

● More than half the businessmen queried reported that pressures to conform are growing, or at least not decreasing.

● Nearly 30 percent said job requirements have hurt their health in the past five years, mainly "from increased strain and tension brought on by heightened day-to-day business pressures."

● While much of top management is "career-content," an "alarming 40 percent of all surveyed middle managers and 52 percent of the reporting supervisory managers say that they find their work, at best, unsatisfying."

● Nearly 50 percent have changed, or have considered changing, their occupation in the past five years.

One of the highest agreement ratios among the 2,821 usable replies pertained to the effect of business life on personal standards. "About 70 percent of the businessmen . . . admit they have been expected, frequently or on occasion, to compromise personal principles in order to conform either to organizational standards or to standards established by their corporate superiors," the report states.

The study, authored by Dale Tarnowieski, suggests that "the shift in success-related values may be away from the accumulation of treasures that can be readily measured . . . toward the realization of less tangible objectives upon which no price—in dollars and cents, at any rate—can be representatively placed."

The report will be published next month.

Business Climate Betters in EEC, Surveys Confirm

BRUSSELS, May 22 (Reuters).—The business climate in the Common Market has improved and should continue to do so, the EEC commission said today in summarizing the results of monthly surveys carried out from last October to January among industrialists of the six original members of the EEC.

Speaking of the community as a whole, the commission's report said the surveys confirmed the improvement in the business climate recorded by economic indicators.

"The replies from managements both to the questions relating to demand and to those concerning production show the persistence and, even in certain cases, the accentuation of expansion, the report said.

"Thus, overall demand has become firmer: at the end of January, 78 percent of managements considered their total order books were 'normal' or 'above normal' as against 75 percent at the end of October."

Industrialists were more optimistic about their future in January than they were four months earlier. "At the end of January, 30 percent of them expected activity to rise during the coming months, as against 21 percent at the end of October," the report added.

One Dollar...

HELLENIC INDUSTRIAL DEVELOPMENT BANK

Worldwide headquarters for disease control is the Atlanta based national Center for Disease Control. CDC participates in global programs to eradicate and prevent the spread of communicable and vector-borne diseases, and conducts extensive applied research activities toward developing methods of diagnosis, control, and prevention. The Center trains about 10,000 health workers from around the world and conducts seminars for thousands of members of professional societies and health associations every year. Teams of specialists are mobilized within hours to help quell such emergencies as an outbreak of smallpox in Yugoslavia or the spread of bubonic plague from Java. CDC adds international medical importance to Atlanta—the world's next great city.

z—Sales in full.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. h—Declared or paid after stock dividend or split up. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. p—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex-dividend or ex-distribution date.

cld—Called. x—Ex dividend. y—Ex dividend and sales in full. x-dis—Ex distribution. xr—Ex rights. xw—Without warrants. ww—With warrants. wd—When distributed. wi—When issued. nd—Next day delivery.

vi—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies. fn—Foreign issue subject to interest equalization tax.

Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

U.S. Living Costs Rose .6% In April, Food Tops List

(Continued from Page 1)

Department's Bureau of Labor Statistics said average weekly increases of .5 percent each in $141.72. The rise resulted from increases of 0.5 percent each in the average work week and in average hourly earnings which were partially offset by a seasonally adjusted .6 percent increase in consumer prices.

The White House said there is still much work to be done to bring inflation under control and hinted that President Nixon may be considering new moves in the economic field.

Presidential spokesman Gerald Warren said the administration is monitoring the economy constantly and that "when we have an announcement in this field, we will make it."

But Mr. Warren reaffirmed statements by senior administration officials that another devaluation of the dollar is not being considered.

The administration has said it expects food prices to begin tapering off later this year and has resisted any further controls.

The report said the price of meat, poultry and fish bought in grocery stores rose 1.6 percent on a seasonally adjusted basis, compared to a record jump of 5.8 percent in March. This was 23.4 percent higher than a year ago.

Price increases for fruits and vegetables, meats, restaurant meals, clothing, used cars and gasoline accounted for about three-fifths of the increase in the consumer price index, which is now 5.1 percent higher than a year ago, the government said.

After seasonal adjustment, the increase in the April index was .6 percent.

The index for nonfood commodities rose at a rate of .7 percent unadjusted in April and .4 percent seasonally adjusted. In March, the increase was .5 percent both adjusted and unadjusted.

The cost of services, including rent, transportation and medical care, increased .3 percent last month, matching March's increase.

The bureau said the rise in nonfood prices was larger than usual for April, blaming the advance on higher prices for clothing, used cars, gasoline, furniture, housekeeping supplies, bicycles, newspapers, magazines and tobacco products. In addition, new car prices went up instead of declining as they usually do in April.

ENERGY INTERNATIONAL N.V.

(Incorporated with limited liability in the Netherlands Antilles)

Shareholders in the Fund are convened to attend the Annual General Meeting of Shareholders to be held on Friday, 15th June, 1973, at 10 a.m., at the registered office of the Fund at Handelskade 24, Willemstad, Curaçao, Netherlands Antilles.

The items on the Agenda are: Report and Accounts for the year ended 31st March, 1973, proposal of a dividend of 15 cents for the year ended 31st March, 1973, reelection of Members of the Board of Management.

In order to attend the meeting in person or by proxy and to have their votes registered at the meeting, holders of Bearer Shares must deposit their shares (or a deposit receipt for their shares), mentioning their names, addresses and nationalities, at the registered office of the Corporation not later than Friday, 8th June, 1973.

By order of the Board of Management.

Curaçao, 21st May, 1973.

z—Sales in full.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. h—Declared or paid after stock dividend or split up. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. p—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. r—Declared or paid in preceding 12 months plus stock dividend. t—Paid in stock in preceding 12 months, estimated cash value on ex dividend or ex distribution date.

cld—Called. x—Ex dividend. y—Ex dividend and sales in full. x-dis—Ex distribution. xr—Ex rights. xw—Without warrants. ww—With warrants. wd—When distributed. wi—When issued. nd—Next day delivery.

vj—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies. fn—Foreign issue subject to interest equalization tax.

Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

BUSINESS OPPORTUNITIES

Unusually interesting opportunity for participation in

state-licensed International Casino in Funchal Madeira (Portugal)

(exclusive license runs until 2003)

Generously supported by the Portuguese authorities: the state collects only 5 percent of the casino receipts (compared with 60 percent in France and about 85 percent in West Germany). Portuguese government loan of 17.2 million DM.

- **Minimum investment DM 20,000.— (issue Price 105 per cent) on a silent partnership basis**
- **Expected return: 25.1 per cent**
- **From January 1,1974, a guaranteed minimum return of 8 per cent from the casino profits.**

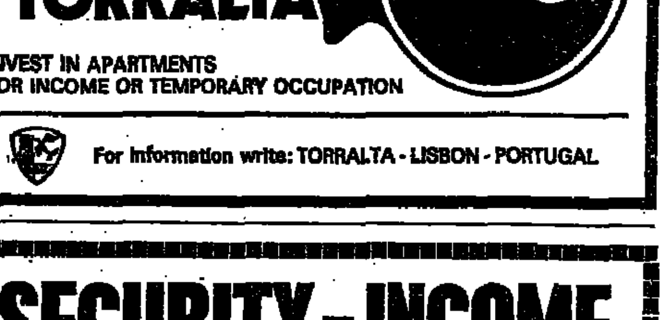

The Casino is part of an international tourist complex with 820-bed Luxury Hotel and Congress Centre, which is now being built on Madeira and is scheduled for completion in 1974.

BRIDGE

By Alan Truscott

GUARUJA, Brazil.—A "safe" lead cost the Aces a bundle of points on the diagramed deal from their hard-fought match against Italy in eight-round play in the world team bridge championships. Both teams reached the slightly optimistic contract of four spades with the North-South hands shown in the diagram.

In one room, Bob Hamman, sitting North for the Aces, became the declarer and East made a passive lead in his weakest suit, diamonds. This gave nothing away, and Hamman made the normal play in trumps of finessing, playing West for the queen. Although he was able to discard one heart loser on diamonds, he failed by one trick, losing a spade, a heart and two clubs.

In the replay, the bidding went as shown, and Belladonna, South for Italy, became the declarer. Notice North's third bid of three clubs, which showed a short-suit in the partnership style. Belladonna would have preferred to learn that his partner was short in hearts, but he bid the game nevertheless.

The opening lead was also intended to be safe but turned out to be highly unsafe. West led the spade two, feeling that this would give nothing away and might help to limit the declarer's ruffing possibilities. But South now knew the position of the spade queen, for no expert would lead away from the trump queen. So when West led a second trump, after the first trick had been won with the ace and a club to the nine had lost to the king, Belladonna promptly put up the spade king and made his game easily, gaining 12 points for Italy.

BOOKS

A. PHILIP RANDOLPH
A Biographical Portrait

By Jervis Anderson. Harcourt Brace Jovanovich. 398 pp. $1

Reviewed by A.H. Raskin

DIGNITY is in short supply among the mastodons of organized labor. Union presidents occupy block-long suites in marble-and-glass headquarters of regal splendor, exercise stop-and-go power over giant industries, manage billions of dollars in trust funds and are regular attendants at White House banquets for other visiting heads of state. But neither affluence nor authority has brought notable personal grace. Even the new breed in labor's high command tends to be made up of men with rough edges, ill at ease away from the bargaining table or the political auction mart.

For a half century, the most conspicuous exception to this dreary rule has been the founder of one of the country's tiniest and poorest unions, A. Philip Randolph of the Brotherhood of Sleeping Car Porters. Chesterfieldian in taste and manners, Randolph always wore his dignity as a shining shield even when his trousers had so many patches there was no room for another. That all-pervasive courtliness did not desert him when Woodrow Wilson's Justice Department urged his prosecution as "the most dangerous Negro in America" for his pacifist preachments in World War I. Nor was it absent a quarter century later when, through sheer intensity of moral commitment, he faced down Franklin D. Roosevelt and Harry S Truman in his successful campaigns for executive orders banning Jim Crow practices in defense industries and the armed forces.

In the stench of Watergate and the widespread despair about both the worth and adaptiveness of American institutions, there is special timeliness to the publication of Jervis Anderson's admiring and admirable biography of this little-known and less-understood battler for human decency —one whom history may yet credit with having exerted a more profoundly beneficial influence on 20th-century America than any other leader of either labor or civil rights.

The Randolph story, told faithfully as well as fondly, is a reminder that not all is dross in the American dream, a restoration of faith that one man's life can count. Armed only with the depth of his conviction that the black masses could become an instrument for their own deliverance from exploitation, Randolph enters his 85th year with the satisfaction of having achieved substantial, if not conclusive, victories over the entrenched forces of bigotry and repression.

As the Anderson book notes with sensitivity, many of these triumphs—even the 1963 March on Washington, which brought 200,000 blacks and whites to the Lincoln Memorial in a moving demonstration for passage of the omnibus Civil Rights Act—have currently been brought into question through the political backlash among fearful whites and the even more pronounced revulsion among many black activists against the Randolph creed of black-white unity for social progress. But Randolph, for his acknowledgment of the tants' role in deepening Ar can awareness of the racial plosiveness in urban ghettos mains as dedicated to non lent integrationist solution he was when he fought Ma Garvey's drive for "African pire" in the early 1920s. His union of Pullman porters all-black, but that was the pany's choice, not his. It hir cruited its original work from among former slaves after the Civil War, and it ferred to maintain its own tem of wage slavery by kee the color line unbroken.

When the New Deal gave dolph his first chance to co the Pullman Company's rut union-busting, it struck bac large-scale hiring of Jap and Filipinos to push out union's black stalwarts. A fri senator offered to ram thr a bill requiring that all rail ployees be American cit Desperate as was Randc need for a maximum union he told his would-be savio Capitol Hill that he could n good conscience go along any law that excluded p from jobs on the basis of religion or nationality. The won anyway—by a six-to margin.

For Anderson, a staff wri The New Yorker, the bo something of a joyous voya discovery, a circumstance adds measurably to its qua of excitement and illumin for the reader. When And came to this country fro native Jamaica 15 years ag knew a good deal about M Luther King jr., Paul Rob Roy Wilkins and other le of the black struggle here, he had never heard of Rand

His affectionate putting gether of the pieces will strangers understand why dolph, so elegant of diction aristocratic of mien, surrou always by a velvety but im trable veil of inner privacy, revered by his members an countless thousands more "The Saint." In common Mohandas K. Gandhi, he re ed money as corrupting, anomalous attitude for a tain in a labor movement on the Samuel Gompers p opby of "more." In the Depression, when he was s ing off against a corporate sus whose directorates linked every national center of fina and business power, his sala union president was $10 a and he rarely collected it. when Fiorello H. LaGua newly ensconced as New Mayor, offered his old Soc comrade a $7,000-a-year city with no requirement that he organizing, he said simply: "I ready have a job."

Reading this record of m nobility will lift you several lion light-years out of the sm of today's headlines.

A. H. Raskin is a membe The New York Times Edit Board, and expert on l problems.

Secretariat Was Faster

ack Admits Error Preakness Time

By Gerald Strine

MORE, May 22 (WP).—
s winner Secretariat of-
was credited yesterday
ime of 1:54 2/5 for the
ile middle event in the
frown series after the
conferred with Pimlico's
mer, Ted McLean.
lly, the Visumatic timer
ecretariat in 1:55, while
ers for the Daily Racing
reed on 1:53 2/5.
RF time for Secretariat
ve broken Cannonero II's
track record by three-
a second. Instead, the
gure enabled the Mea-
le colt to edge Nashua's
ding of 1:54 3/5 as sec-
without toppling Cano-
ark of 1:54.
ad to take our timer's
s' time as our official
ate Steward Fred Colwill
. "Rule 383 of the Mary-
s of racing says 'The
mer's time is official.'"
hadn't McLean reported
pancy between the Visu-
tronic system and his
immediately after the
hy had he waited for 18
stead of promptly noti-
e stewards of the dif-
as he had done twice
the meeting?

"I think he was kind of embarrassed about it," Colwill replied. "It probably slipped his mind. It's one of those human errors we all make from time to time. He had some other duties to perform in the infield after the race was over, so perhaps it skipped his mind."

McLean acknowledged that he had been busy late Saturday afternoon, after Secretariat had added the Preakness to his Kentucky Derby victory.

"I took my time on the porch in front of the jockeys' room," he said. "As soon as it was over, I had to hurry down and get the horse into the winner's circle, get the rider [Ron Turcotte] off, check his official weight and get him onto the platform.

"And let me tell you something: there was a mob of people out there."

His stopwatch recorded :24 2/5 for Ecole Etage's first quarter-mile Saturday, three-fifths of a second faster than the :25 posted by Visumatic. Thereafter, McLean's time is three-fifths of a second faster than Visumatic's at every checkpoint around the track: :48 1/5, 1:11 2/5, 1:35 3/5 and 1:54 2/5.

Daily Racing Form, meanwhile, held firm to its 1:53 3/5 taken by Gene Schwartz and Frank Robinson, two of the most respected clockers in the nation. The 1973 Preakness chart will carry McLean's time as official, but with the DRF figures appearing in parentheses.

Colwill and the other Pimlico stewards did not attempt to check the time with a stopwatch against videotape film.

"We were committed to accepting our official timer's time," he said. "That being the case, what would a check of the videotape have served?"

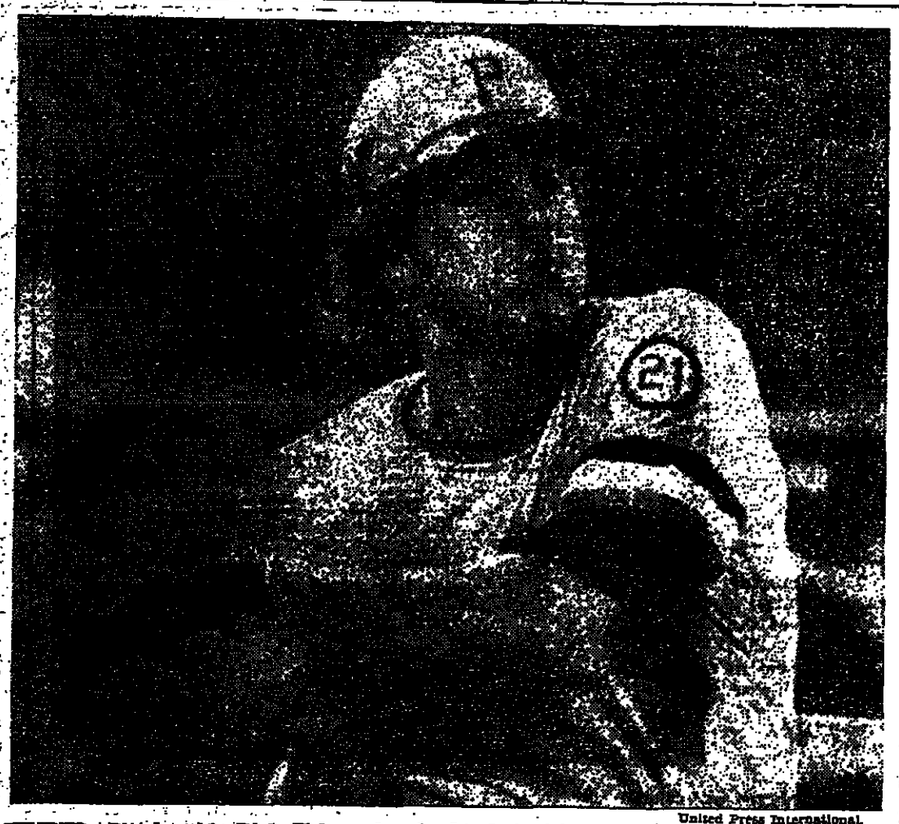

Clem Florio of the Baltimore News American took the trouble to time the video reply. Six times he hit the button. Five times it stopped at 1:53 4/5. The sixth reading was 1:54. Such a check does not figure to be off more than a fifth of a second.

"All this proves," one disgruntled Pimlico official said at day's end, "is that if you put four timers on a race—from the same position so that they'd get the same angle on the eight poles—you'd get four different times."

Maybe not. On balance, there would appear to be little doubt that Secretariat set a Preakness record. Yet T:54 2/5 will stand.

unner-Up Try Again

YORK, May 23 (NYT).
: Martin, trainer of
said yesterday that his

TIMBER—Pittsburgh's Rich Hebner breaks his bat while swinging at a Steve Carlton pitch in the fourth inning of Monday's game. The Pirates defeated Philadelphia, 5-4.

Tiant's 4-Hitter Brakes Baltimore

BALTIMORE, May 22 (UPI).—Luis Aparicio's two-run single in the seventh inning and Carl Yastrzemski's two-run double in the ninth backed the four-hit pitching of Luis Tiant last night as the Boston Red Sox defeated the Orioles, 4-1.

Tiant, 5-4, retired 13 Orioles at one stretch as he outduelled Jim Palmer. The defeat snapped Palmer's winning streak at three games and dropped Baltimore under the .500 mark with a 17-18 record.

The Orioles took a 1-0 lead in the first inning off Tiant, when Al Bumbry doubled and scored on Boog Powell's single.

But with two outs in the seventh, Rick Miller doubled and Dwight Evans and Tommy Harper walked to load the bases for Boston. Aparicio then delivered a solid single to center-field to score Miller and Evans.

A's 5, Royals 0

At Oakland, Jim "Catfish" Hunter pitched an eight-hit shutout and designated-hitter Deron Johnson hit a double and a two-run homer to lead the A's to a 5-0 victory over Kansas City.

Singles by Bert Campaneris, Dick Green and Ray Fosse produced the other Oakland runs as the A's climbed back into fourth place in the American League West, a half-game ahead of Minnesota but three games behind pace-setting Chicago.

Indians 10, Yankees 5

At Cleveland, Gaylord Perry survived a four-run second inning to notch his sixth victory of the season and Buddy Bell collected four hits to spark the Indians to a 10-5 victory over New York.

Thurman Munson accounted for New York's final run with his fifth homer of the year into the upper deck in the fourth.

Giants 9, Astros 4

In the National League, Chris Speier drove in four runs with a homer and a triple to pace San Francisco to a 9-4 victory over the Astros at Houston.

Speier tripled in two runs to cap a four-run rally in the first inning and, after Houston had cut the Giants' lead to 5-4, he hit a two-run homer in the seventh to put the game out of reach.

Pirates 5, Phillies 4

At Philadelphia, pinch-hitter Richie Zisk singled home Gene Alley with the deciding run in the ninth inning to give Pittsburgh a 5-4 victory over the Phillies, who blew a 4-0 lead behind ace Steve Carlton.

Alley singled off reliever Mac Scarce to open the ninth inning and was sacrificed to second by Milt May. Zisk, batting for pitcher Steve Blass, who won only his second game of the season, then singled to left to score Alley.

Conteh Beats Finnegan for 2 More Titles

WEMBLEY, England, May 22 (Reuters)—John Conteh, European light-heavyweight boxing champion, collected two more titles here tonight when he outpointed fellow Briton Chris Finnegan over 15 rounds.

The hard earned victory meant that the 21-year-old Conteh took over Finnegan's British and Commonwealth light-heavyweight titles, and efforts are now likely to be made to match him in a world championship fight with American Bob Foster.

On the evidence of tonight's performance, Conteh has the strength and ability to step into world class. But with only 20 professional fights behind him, he probably needs a little more experience.

of course, been severely
this season, but one also had the impression that he did not much care about what happened. Bayern Munich is known to want him badly. That Olympic Stadium in Munich takes a great deal of filling.

These are bad days for West German football, a sharp contrast with a year ago. Its 1-0 home defeat by Yugoslavia was the second this year, and the 3-0 victory over Bulgaria, a few days later, did little to erase the memory. The Bulgarians, though they seem fairly sure to win their World Cup group against Portugal and Ulster, played with what seemed a huge inferiority complex.

The West Germans will need a Netzer at his best and most enterprising in midfield if they are to do well in the World Cup next year.

The Brazilians, meanwhile, World Cup holders, have announced their party of 22 for their Old World tour and will be leaving for North Africa on June 30. They will then subject their new team to a hectic baptism of fire, probably using both Gerson and Rivelino, the two left-footed inside-forwards, in deeper lying positions. The 1970 World Cup right-half, Clodoaldo, is a little put out that Gerson may be operating in his place.

The lack of Pelé may be determining. He is simply irreplaceable, whatever Brazil did without him in the 1962 tournament in Chile, when Amarildo efficiently took his place.

There are also serious doubts about whether Tostao, who will miss the tour, will be able to recover his eyesight as he did in 1970. Recently the brilliant center-forward had a further operation in Houston, to remove plastic fragments from his eye.

There is an important World Cup qualifying match in Gothenburg today. If the Austrians can hold Sweden to a draw, it will mean that the Hungarians will have to defeat them 4-0 in Budapest on June 13 to qualify on goal average.

Tennis Elite Gathers in Paris

French Open Starts Today

By Bernard Kirsch

PARIS, May 22 (IHT).—The season of tourists is taking over and all tennis excursions lead to Paris this week.

With four exceptions, the elite of tennis will start after the French Open tennis crown tomorrow. Players like Jimmy Connors will find out where they rate in the tennis world and Chris Evert will have a better idea of how she will do against old man Riggs in September.

Chris, who has traveled on the United States Lawn Tennis Association tour this year, is the second seed here. This year, while she has been overwhelming her circuit, she has yet to face No. 1 Margaret Court, the leading lady of the Virginia Slims extravaganza.

"Now, we're all back together again," Chris said today after a practice session at Roland Garros Stadium on the slowest clay courts she has ever played on. "It'll be interesting to see how everyone does here. They had their tour, and we had ours."

This year, only Billie-Jean King, the defending champion, and Rosemary Casals have opted not to see the Eiffel Tower.

For the men, Rod Laver—because of injury—and Ken Rosewall—who wants to rest—will be absent. Ilie Nastase, No. 2, will be here and he will have a chance of renewing his rivalry with No. 1 Stan Smith. Connors can start many new ones.

Won 6 of 8 Tourneys

In the opening half of the season, Connors participated on the USLTA indoor tennis circuit, and won six of eight tournaments. In his league were "Nasty, (Juan) Gisbert, a couple of German boys and some other good players," he said. But no Smith, Arthur Ashe (seeded third after the dropout of Laver), John Newcombe, or any of the 64 men on the World Championship Tennis tour.

Talking about the reunion here, Connors, 20, said, "This is the way it should have been all the time. We should all be together to find out the best in the world."

Connors, who recently moved to Fort Lauderdale, Fla., said that he kept off the WCT circuit because "I needed another year's experience. Now, I've got the experience; I've got the confidence."

Jimmy Connors will find out in Paris where he rates.

A victory here would give him the reputation.

But what Connors and most of the other Americans in the field of 124 men and 62 women are lacking is knowledge of the slow clay of Roland Garros. Connors and Miss Evert both said, "American clay is much faster." The clay here, though, should also hinder the big serve of Mrs. Court, who won here in 1969 and 1970 and is now 30.

Mrs. Court could also be hurt by the after-effects of her recent loss to 55-year-old Bobby Riggs—a subject people try not to mention when talking to the sensitive Australian. The third-seeded woman is England's Virginia Wade, and No. 4 is Australian Evonne Goolagong, who won here in 1971 but has yet to beat Miss Evert this year.

Another liability for the Americans will be a new rule which makes the first two rounds here best-of-three-set matches, with the tournament then switching to its usual best-of-five format. (Officials here said that the change was made—with the agreement of the players association—because of the crowded calendar.) Many of the U.S. players, coming from the cement-like courts of Las Vegas, may need two sets to acclimate here. By then, it may be too late.

While most of the competitors have been practicing the past three days, Smith, attending to business in the United States, has yet to arrive. But his friend, Brian Gottfried, said: "Stan adapts quickly."

The French Open is the only major event Smith has not won. It is one of many which has eluded Connors.

The French Open tennis committee gave Yugoslavia's Nikki Pilic permission today to play here—and will probably root for him to lose sometime between tomorrow and June 1. Pilic, on the WCT tour, was suspended by the Yugoslav Tennis Federation for not playing a recent Davis Cup tie. But Pilic appealed the verdict, and the International Lawn Tennis Federation told the French that Pilic could play until a definite decision is reached June 1. Somebody would be embarrassed if, by then, the Yugoslav had gained the final.

12 Pioneers Named Football Hall-of-Famers

NEW YORK, May 22 (NYT).—Twelve football players who started their college careers before 1920 were named yesterday to the Pioneer Player category of the National Football Foundation's College Football Hall of Fame.

The players, who will be honored in special ceremonies at their alma maters this fall, are: Earl (Toughey) Abell, Colgate all-America tackle (1912-1915); Harold Ballin, two-time Princeton all-America, tackle (1912-1914); Aubrey Devine, University of Iowa all-America quarterback (1919-1931); Robert (Bob) Fisher, Harvard all-America guard (1909-1911); Forest (Spot) Geyer, University of Oklahoma fullback (1913-1915).

Arthur Howe, Yale all-America quarterback (1911); John Maulbetsch, University of Michigan all-America halfback (1912-1914); Murray Shelton, Cornell all-America halfback (1913-1914); Gaylord Stinchcomb, Ohio State University all-America halfback (1918-1920); Henry Seibels, captain and star back of Sewanee's famed 1898 and 1899 teams, which won five games in six days; Clarence Swanson, University of Nebraska all-America end (1919-1921), and Hube Wagner, University of Pittsburgh end (1910-1913).

Only Ballin, Devine, Stinchcomb, Shelton and Wagner are alive. The others will be represented by next of kin at the campus ceremonies.

The player category will be extended next year to include players of 1927, then to the 1934 season, in an effort to eliminate the pioneer category and form one all-inclusive category. The East dominated the early-day all-America selections and outstanding players from all sections of the country did not begin receiving national recognition until around 1930.

California Gets Epstein in Trade

ANAHEIM, Calif., May 22 (UPI).—The California Angels have obtained Mike Epstein, a 30-year-old first baseman who hit 26 home runs and drove in 70 runs for the world champion Oakland A's last season, in a five-player trade with the Texas Rangers.

The Angels sent Lloyd Allen, a 22-year-old right-handed pitcher with no record and a 10.38 earned run average, and Jim Spencer, a 25-year-old first baseman batting .241, to Texas. In addition to Epstein, California was given Rich Hand, a 24-year-old right-hander, and Rick Stelmaszek, a 24-year-old catcher.

Observer

Immodest Proposals

By Russell Baker

WASHINGTON.—It is not too early in the Watergate business to start drawing lessons and thinking about reform. Following are a few of the more obvious things that might be done to improve the quality of government.

Baker

1. Abolish the FBI and CIA. Both have become intensely bureaucratized agencies with too many activities—electronic eavesdropping, keeping secret dossiers on citizens and members of government, collecting intelligence for domestic political manipulation—characteristic of secret-police functions in a totalitarian state.

The best way to dispose of their threat is to dissolve such bureaucracies periodically—every 10 years perhaps—and empower Congress to create such new national police bureaus as may from time to time seem necessary.

This might even improve police and intelligence performance, since new government agencies tend to be dynamic and effective while aged ones become absorbed in internal politics and wasteful, possibly dangerous plots for expanding their own power.

2. Get the President off Mount Olympus. The important thing is to restore his contact with American life. At present he is treated like a live mummy, wrapped tightly in his own highly peculiar work problems and sealed off from the living world in the famous Oval Tomb.

Periodically, Presidents ought to be compelled to drive their cars in a rush hour, catch a taxi in the rain, and wait their turn for a drugstore-counter lunch. Since this is probably impossible—because of our hundreds of thousands of armed maniacs—we may have to be satisfied with more modest inroads upon his grandeur. His emperor's fleet of transport vehicles, for example, can mostly be disposed of. His assistants can surely make do with taxi or bus.

He should be placed under some inexplicit compulsion to maintain modest contact with the public. Once a month, perhaps, he might be required to sit in front of TV cameras and talk to us about what is going on.

3. Get the President out of show business. The present grotesque importance accorded "charisma" among presidential politicians reflects the disagreeable tendency in American life to look upon the President as a superstar.

There is no reason why a President should be young, handsome, dynamic, brilliant, decisive and capable of charming 80 million people on a video screen at the dinner hour. These requirements probably reflect the country's dislike of old people, the one remaining minority it is okay to hate. (It is against the law to deny a person a job because of his color, but we habitually fire people for getting old—it is called "retirement"—and cut off their social security if they try to go on working.)

We ought to think about the virtues of old men as Presidents. A little more fatigue in the White House, if coupled with the wisdom of age, might be a healthy antidote after so long a period of Presidents playing touch football and frequenting locker rooms.

4. Cut presidential campaigns to eight weeks. Outlaw political advertising. Provide limited amounts of free TV, radio, newspaper and billboard space for major candidates.

Make the Internal Revenue Service start enforcing the gift-tax law on big contributions to politicians. And why not, as long as we are discussing the impossible, change the President's term from four years to three? Four years is too long to wait for a referendum on presidential performance. Considering the volatility of the times, three years is probably too generous. The faster turnover in Presidents which would result from the three-year term would probably tend to make them more commonplace and, therefore, less regal. It would compel them to keep in mind that a President is, after all, only a President.

Paris, 1973

By Nan Robertson

PARIS (NYT).—Paris, which calls itself "the city of light," has just received a stinging blow to its vanity—which is considerable.

A massive, government-ordered report says that the city's dominance as a world capital of culture has drained away to London and other cities. Nor can it any longer claim to be an important international center of business and finance.

The 2,000-page study concludes that Paris is now run for the sole purpose of economic development. It says that the authorities who are shaping its destiny have failed to take account of one crucial fact: the economic and political future of the city is strictly dependent on its cultural influence and heritage, its sociological atmosphere and its quality of life.

In short, Paris is in danger of losing its soul.

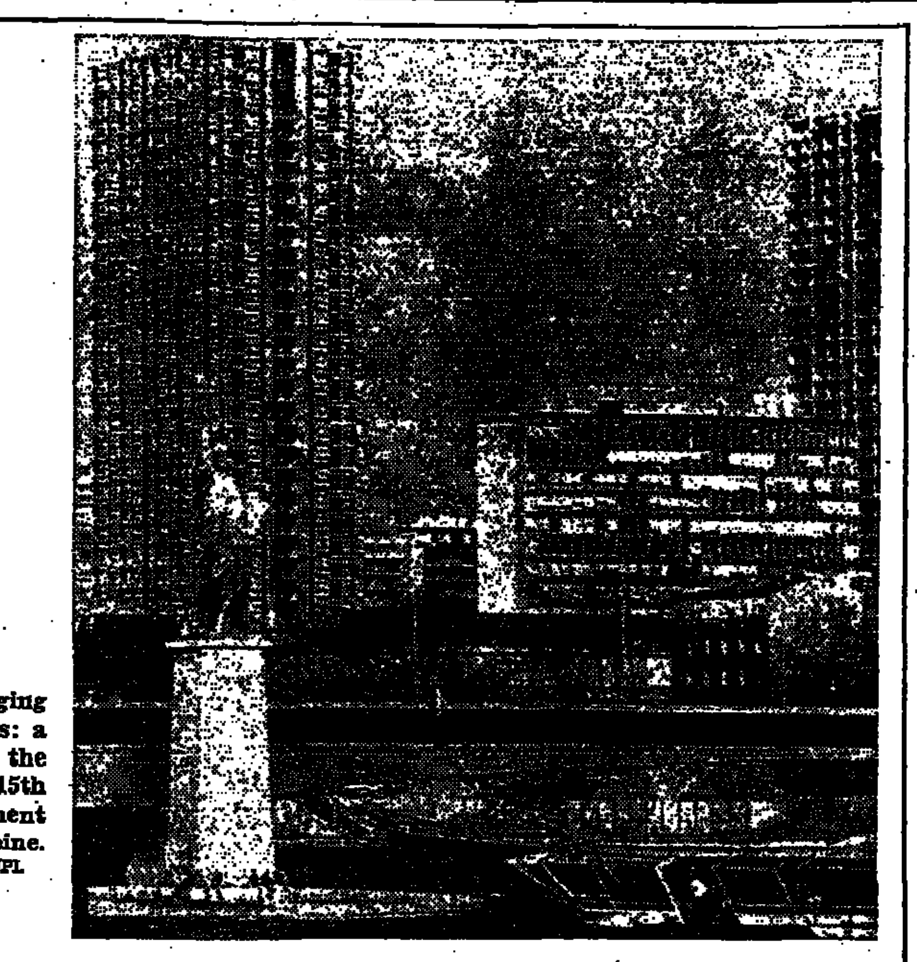

The survey was ordered by the French Ministry of Planning, took two years to complete, and will be made public at the end of June. An 80-page summary is now available to the press, and excerpts from it were splashed over Paris newspapers last weekend.

The report details the disenchantment about Paris of some 200 "personalities of international stature" in the worlds of art, letters, journalism, finance, business and high levels of the civil service. The majority of them are not French.

They gave their opinions in lengthy interviews conducted in eight countries: France, Belgium, Switzerland, Germany, Sweden, Italy, Great Britain and the United States. The summary did not name them.

Their criticisms went much deeper than the usual complaints—which they also voiced—about the French capital's prices, choking traffic jams, the "legendary reputation among foreigners" of a badly functioning telephone system and the skyscrapers that are everywhere brutalizing its once matchless vistas.

Their fears or convictions included the following:

The changing face of Paris: a view of the 15th arrondissement from the Seine. UPI

● The "effervescent" cultural stimulation and freedom of expression for which Paris was universally celebrated are waning. London is now the universal magnet for young artists, craftsmen, fashion designers and writers, drawn by the British capital's more open way of life.

● In Paris, fresh or unorthodox currents of creativity are progressively being stifled, sterilized and discouraged by an unsympathetic and rigid government bureaucracy. The city is "ignorant of contemporary developments in the arts."

● New plays which are enjoying the most success in Paris are virtually all by foreign authors, notably English, American and German. "The theater in Paris, if not exactly dead, seems to be asleep," one of the persons interviewed remarked. "By contrast, English theater is vividly alive. There is fantastic activity in London."

● Nothing new that is natively French is happening on the Paris art scene. Increasingly, it is overshadowed by exciting exhibitions and festivals in such provincial cities as Avignon, Bourges, Bordeaux, Nancy and Rennes.

● Commercial development, chaotic and unchecked, is ruining the city's charm and personality.

● London and Brussels outstrip Paris by far as international business hubs. Only a dozen of the big multinational firms have their European headquarters here.

● A total of 172 foreign banks are represented in London as against 56 in Paris. The deposits in them are six times bigger than those in the French capital.

The energetic young team that pulled together and analyzed the series of reports at the Ministry of Planning is headed by Michel Albert, a 43-year-old inspector of finances. The research they coordinated was based on many other sources besides the 200 interviews.

Their investigation showed, they said, that the philosophy of Paris had passed from "the amenities to cost-effectiveness."

"What makes a city an international attraction is not just its economic power, its size or its location," they said. Much more profoundly, "it is the life-style that it offers. Paris has decided to sacrifice that life-style."

Not since the time of Haussmann, a century ago, has Paris seen so much road work, building construction and physical transformation, the report's authors said. "It is not surprising, under such conditions, that both the detractors who live here and the visiting buffs of Gay Paris are exceedingly rueful about seeing so many souvenirs of the good old days being destroyed."

The survey revealed widespread sentiment that Paris was not just "any old city," but something unique and precious, and that there should be "a halt in continuing to build in Paris as if it were Detroit."

PEOPLE: *Liza Minnelli's New Lov[e] —Actor Peter Sellers*

Scene: A restaurant in London's West End. A spotlight zeroes in on one of the diners, Liza Minnelli, who bursts into song—"Can't Help Loving That Man of Mine." The spotlight then moves to her table companion, Peter Sellers, who—as reporters close in on the couple with pencils poised—says: "Actually I'm getting married to Spike Milligan."

The scene shifts to a London office. Miss Minnelli, who has been appearing at the Palladium, called a news conference on Monday to inform the world that she is in love with Sellers and "the marvelous thing is that he is in love with me." As for Desi Arnaz jr., 21, to whom she was engaged until her recent arrival in London, "My relationship... has been deteriorating gradually, although in a friendly way, happily. There is no more engagement. It's all called off."

Sellers, 47, is separated from his third wife, Miranda. Miss Minnelli, who used to be married to Peter Allen, an Australian singer, is 27. She told newsmen that she was flying to Chicago for several concerts but would be coming back to England soon. As for her personal plans—marriage, perhaps?—Liza had a short answer for a persistent London reporter: "That's private. That is bloody private."

* * *

Stars of the concert world from two continents converged on New York's Metropolitan Opera House Monday night to honor the last of the baggy-pants impresarios, Sol Hurok. The occasion was his 85th birthday—which actually was April 9, but it takes time to organize these things. Isaac Stern played a violin solo, Dame Margot Fonteyn danced an excerpt from "Swan Lake," Van Cliburn played Liszt and two stars of the Bolshoi Ballet—Natalia Bessmertnova and Mikhail Labrovsky—danced the pas de deux from Act II of "Giselle."

The guest of honor, who was born in the Ukraine and went to the United States in 1906, said, "New York is the place where I started and I hope to finish in New York—in another 50 years." The evening's entertainment was introduced by two masters of ceremonies: Agnes de Mille and Sir Robert Helpmann. Proceeds of the ticket sales went to the Performing Arts Research Center of the New York Public Library.

ANNOUNCEMENTS

A NEW TWIST FOLKS: Our "Dear Folks" ad was extremely successful. Many people journeyed to Madrid especially to look at and buy MARLAU furniture. Many others bought by mail. Now we'd like to reverse the process. We'd like to load up a truck or two with a few rooms of furniture, hire a hall in your home town and show you our handiwork, providing you and enough others ask us to come. No catches—no obligations—just enough evidence of interest on your part by way of a note telling us the kind of things you're interested in seeing and we'll be there with bells on.

MARLAU

REY FRANCISCO 8, MADRID.

P.S. Just in case you're a newcomer to these columns!! We're Americans. We've enjoyed working in Spain for twenty-odd years. We make beautiful Spanish furniture which has won acclaim around the world largely due to the early raves of Temple Fielding followed by more than eight thousand cheering customers.

MARLAU of MADRID is on the move Folks: Showing some twenty rooms of its FINE SPANISH FURNITURE at the BERLIN HILTON beginning Sunday, May 27th at 2:00 p.m. and running through Sunday, June 3rd. More dates and places later.

FELLOW AMERICANS! If you have had it in Dick's Watergate paradise but do not think you can afford Europe it is time you found out about ANDORRA, where we are living duty-free tax-free, fully modern and comfortable lives. Write for the full story. C.I.S.A., La Massana, Andorra.
